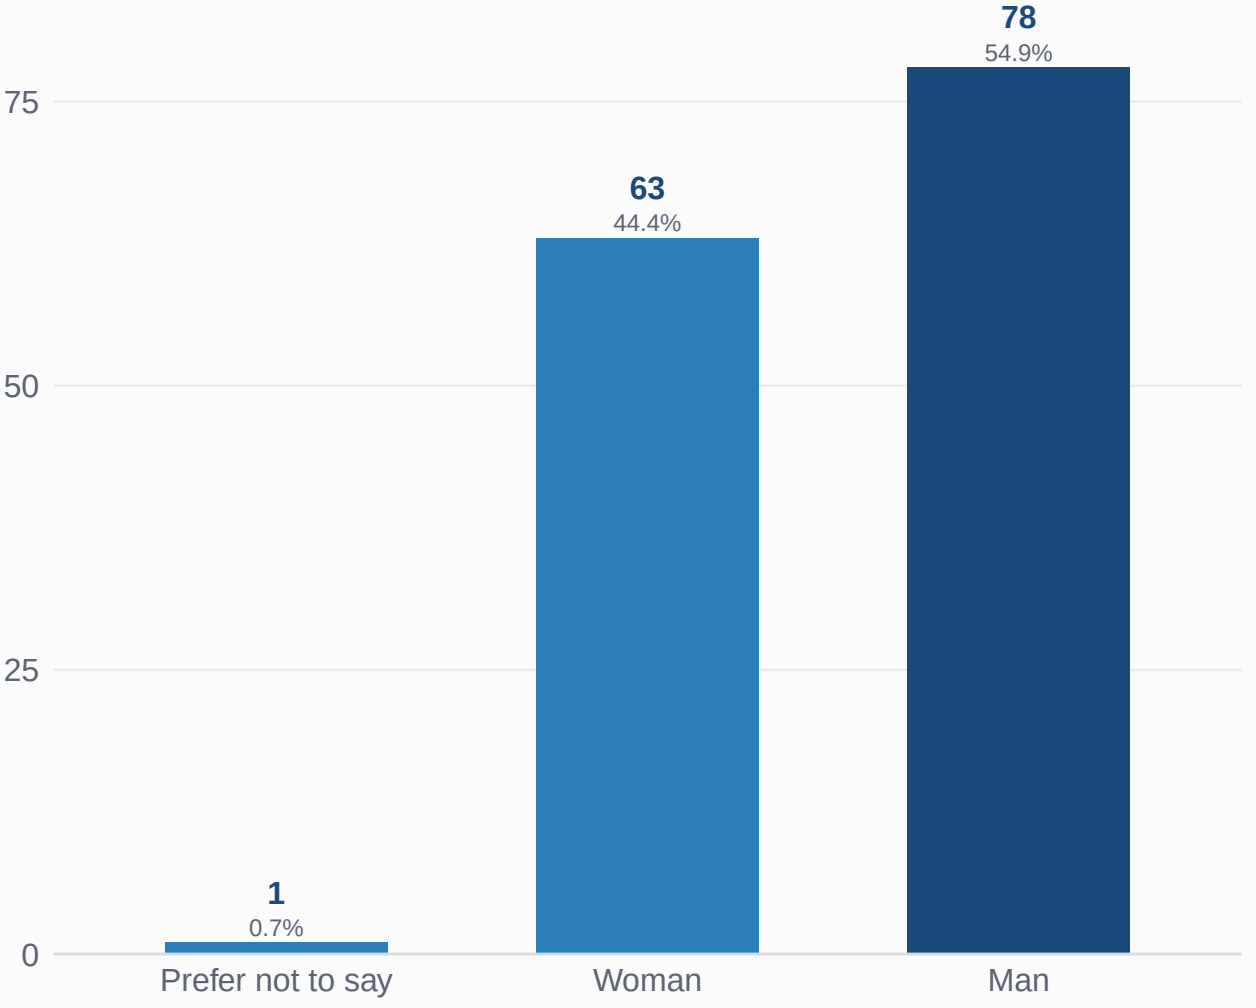
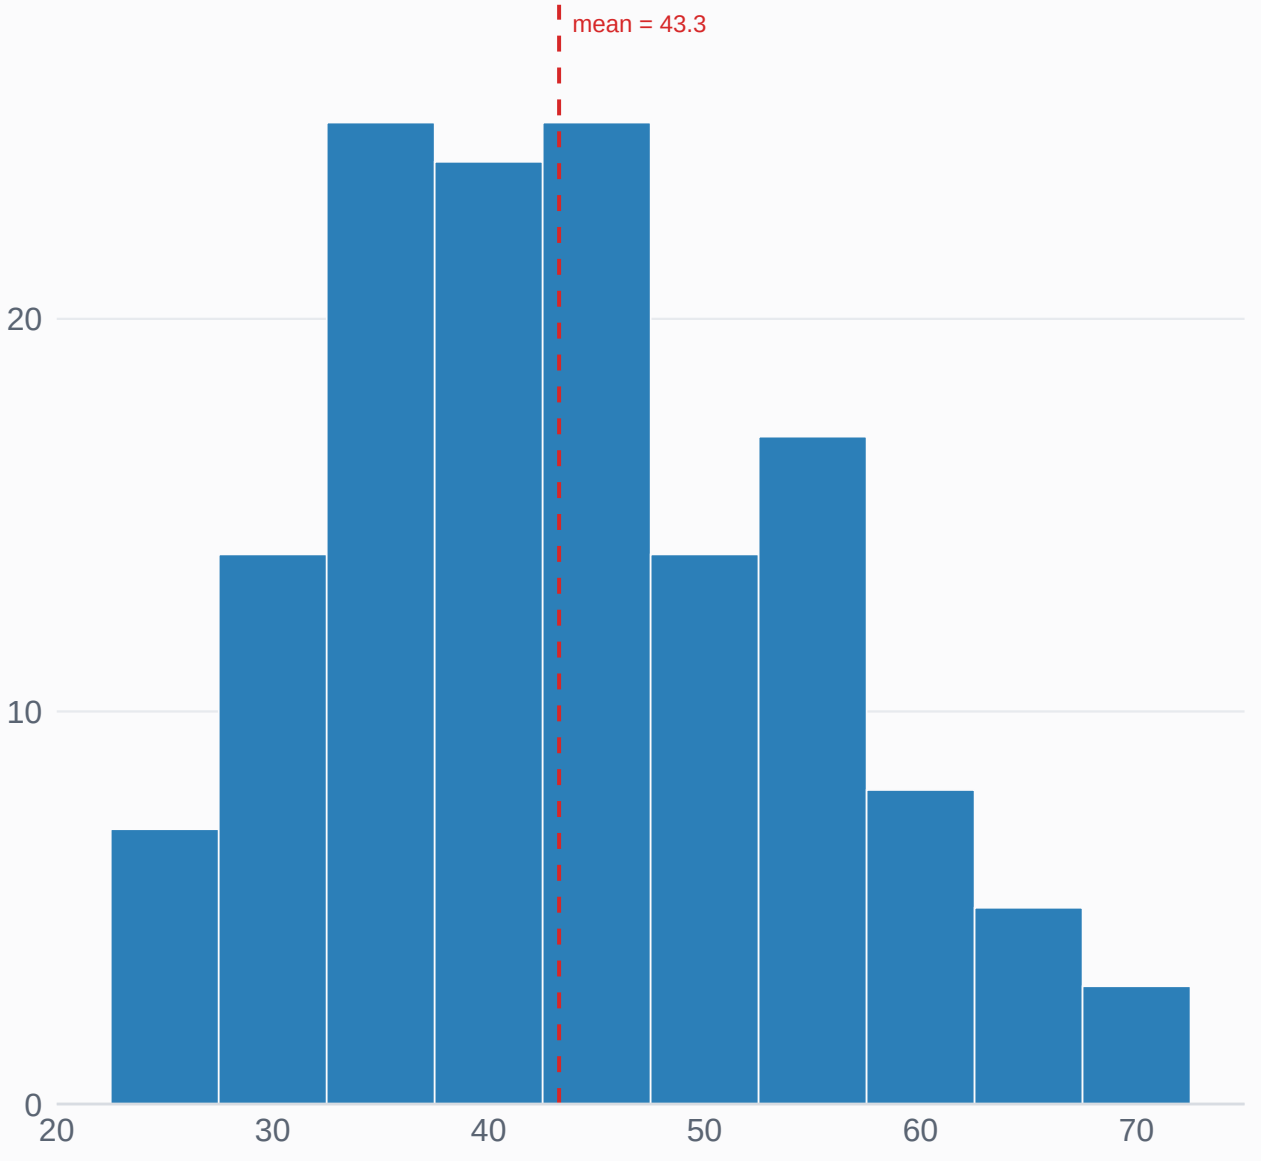
Gender distribution



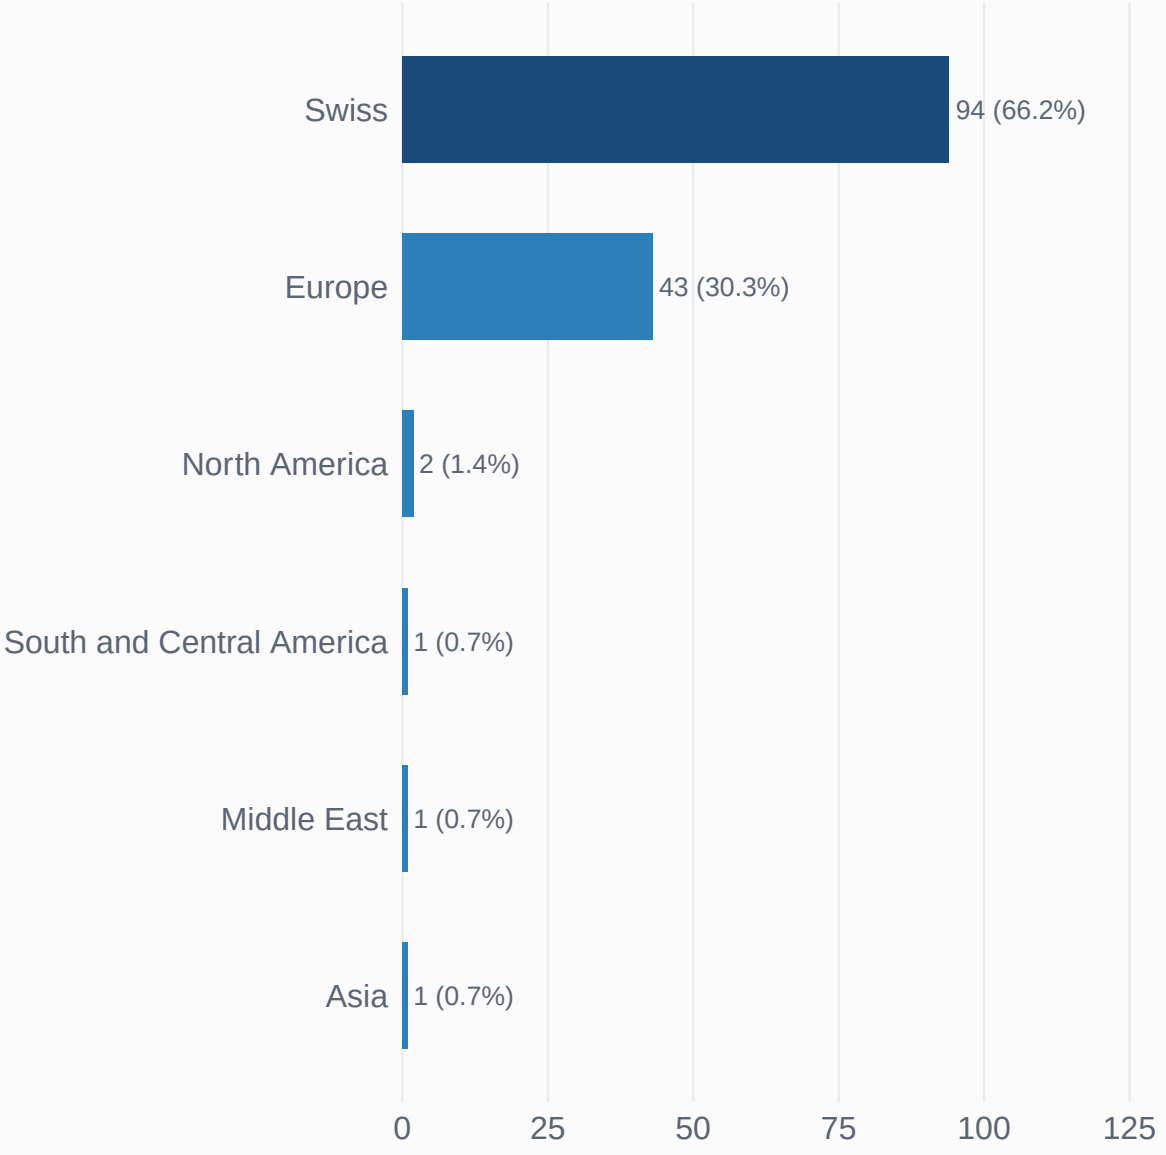
SSS Survey — All respondents — n = 142

Age — descriptive statistics



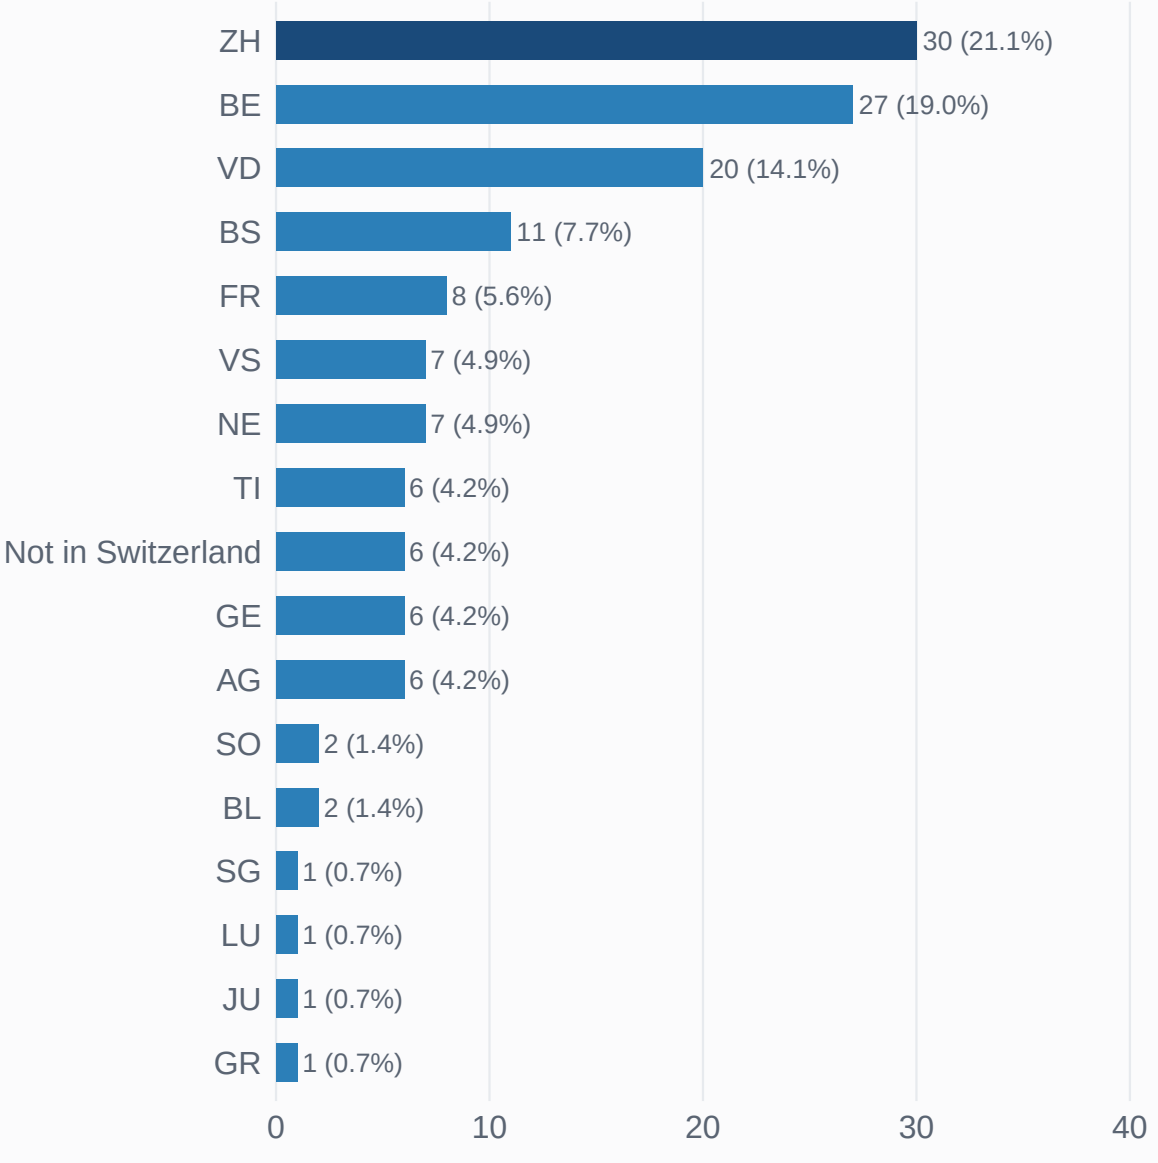
SSS Survey — All respondents — n = 142

Nationality / country of origin



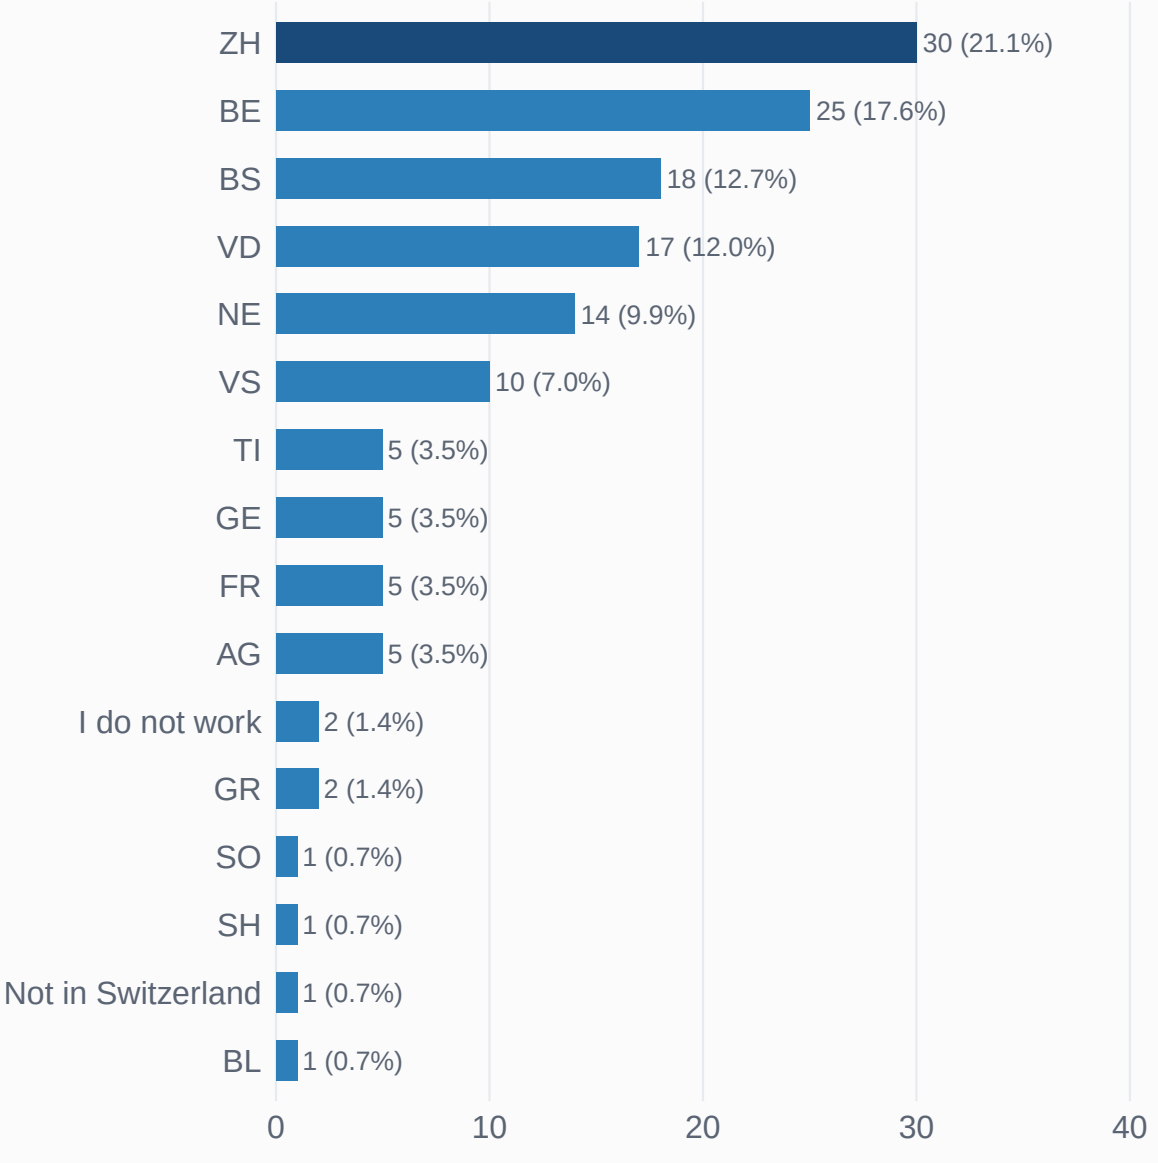
SSS Survey — All respondents — n = 142

Place of residence (canton)



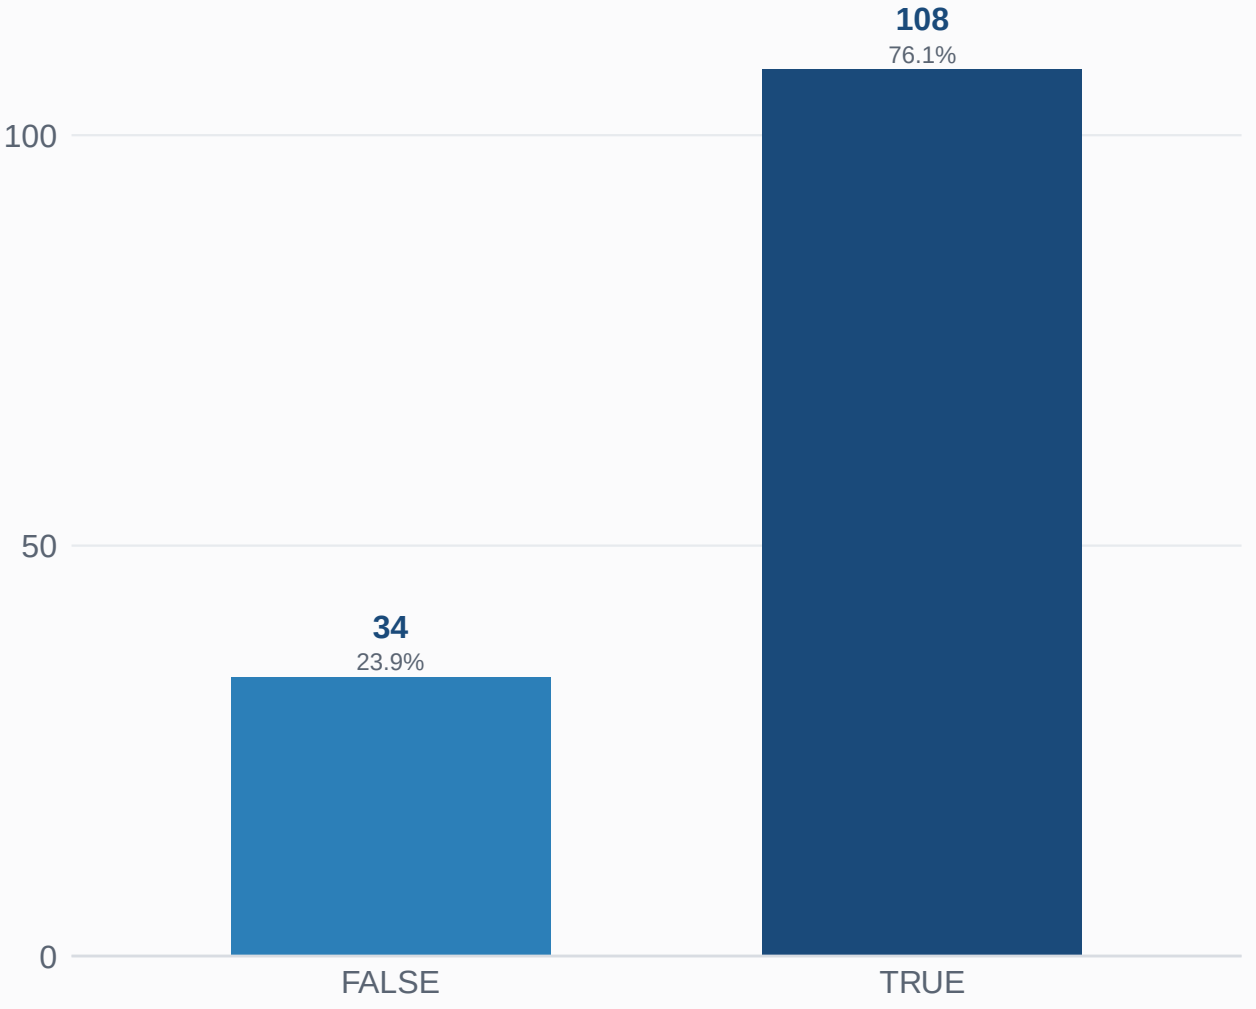
SSS Survey — All respondents — n = 142

Place of work (canton)



SSS Survey — All respondents — n = 142

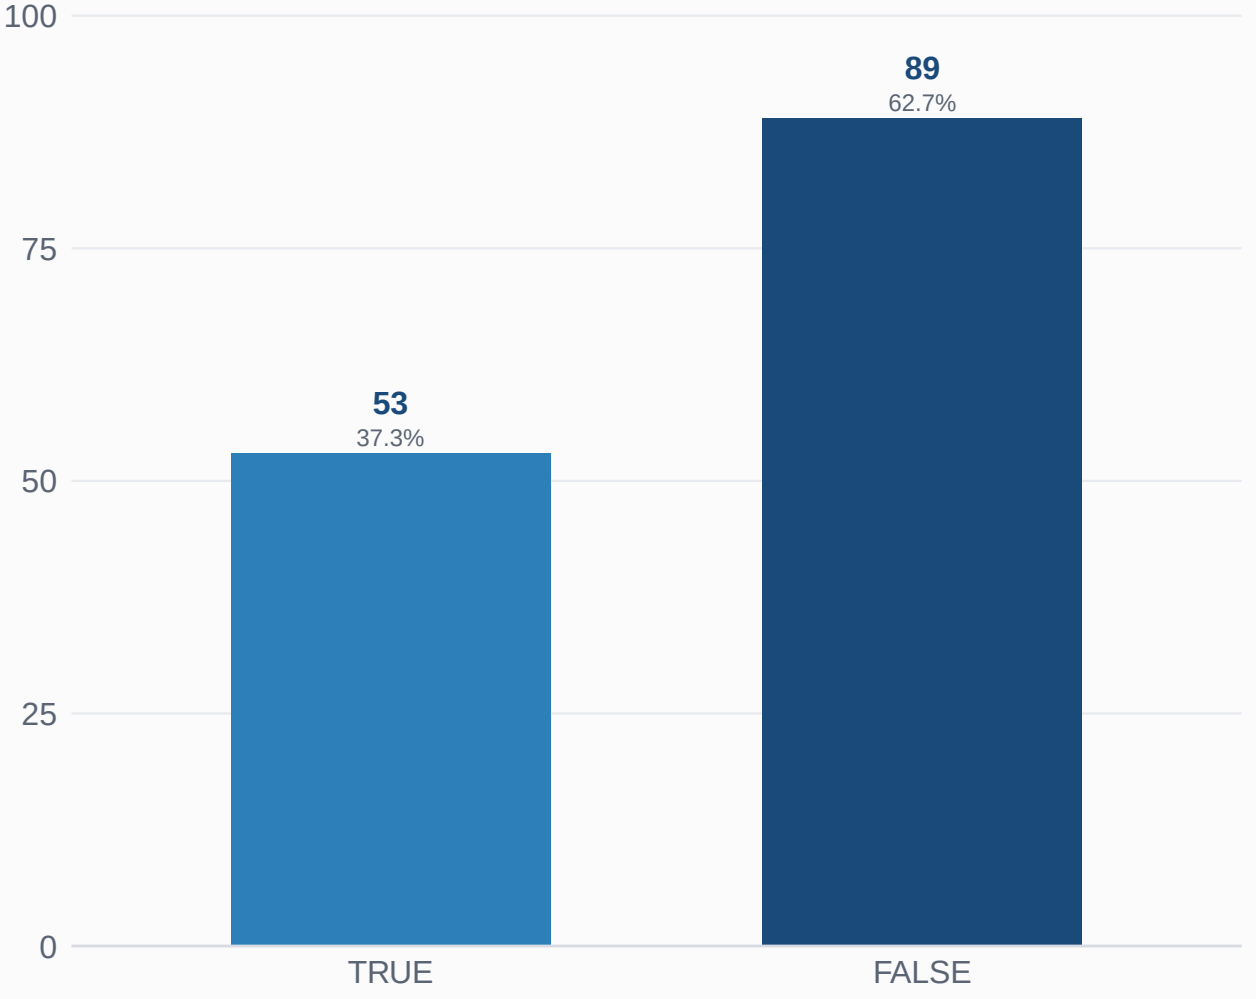
SSS awareness



SSS Survey — All respondents — n = 142

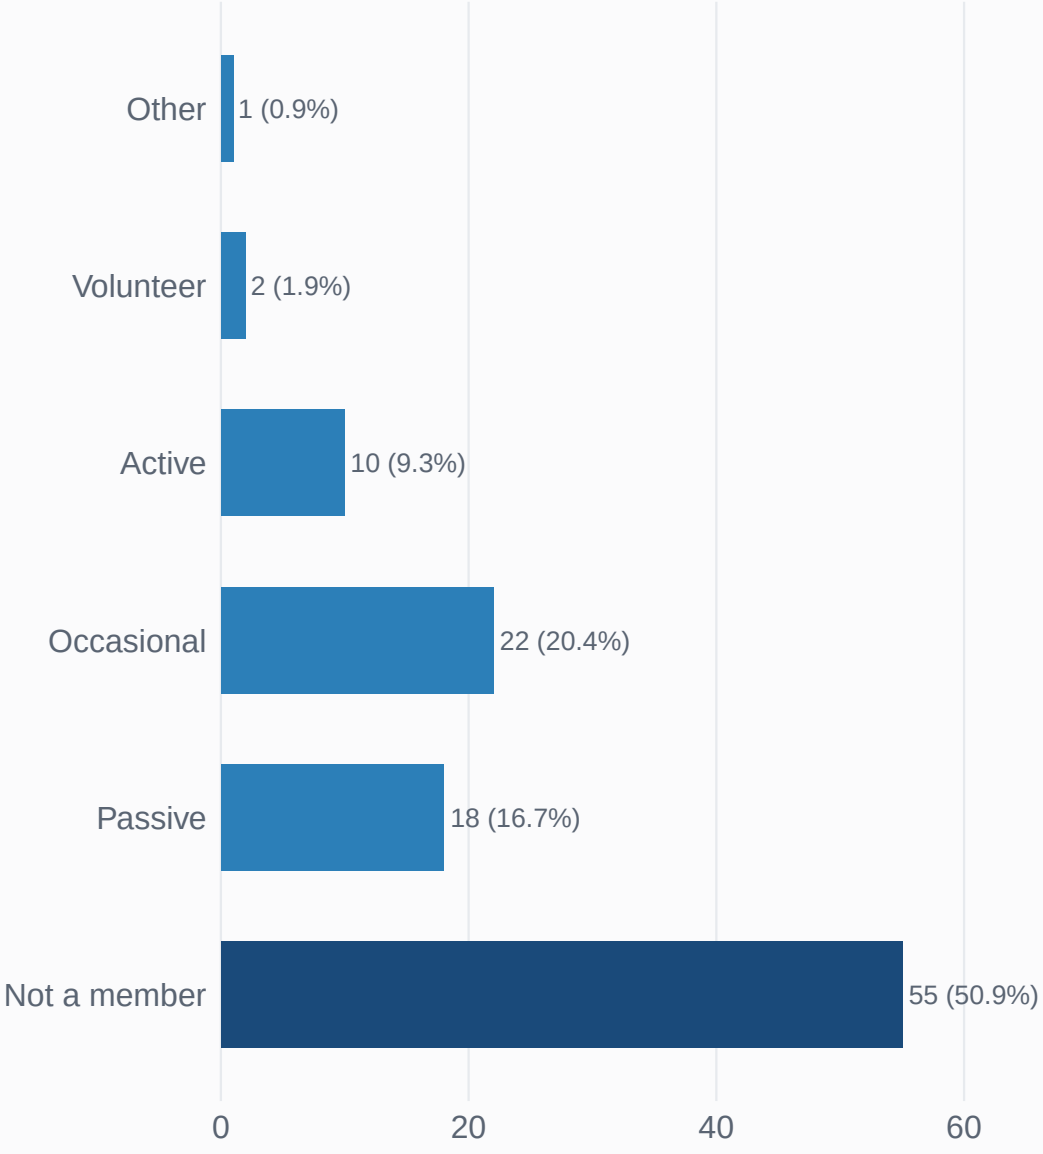
SSS membership (member vs. non−member)

Derived variable — TRUE if involvement level is not 'Not a member'



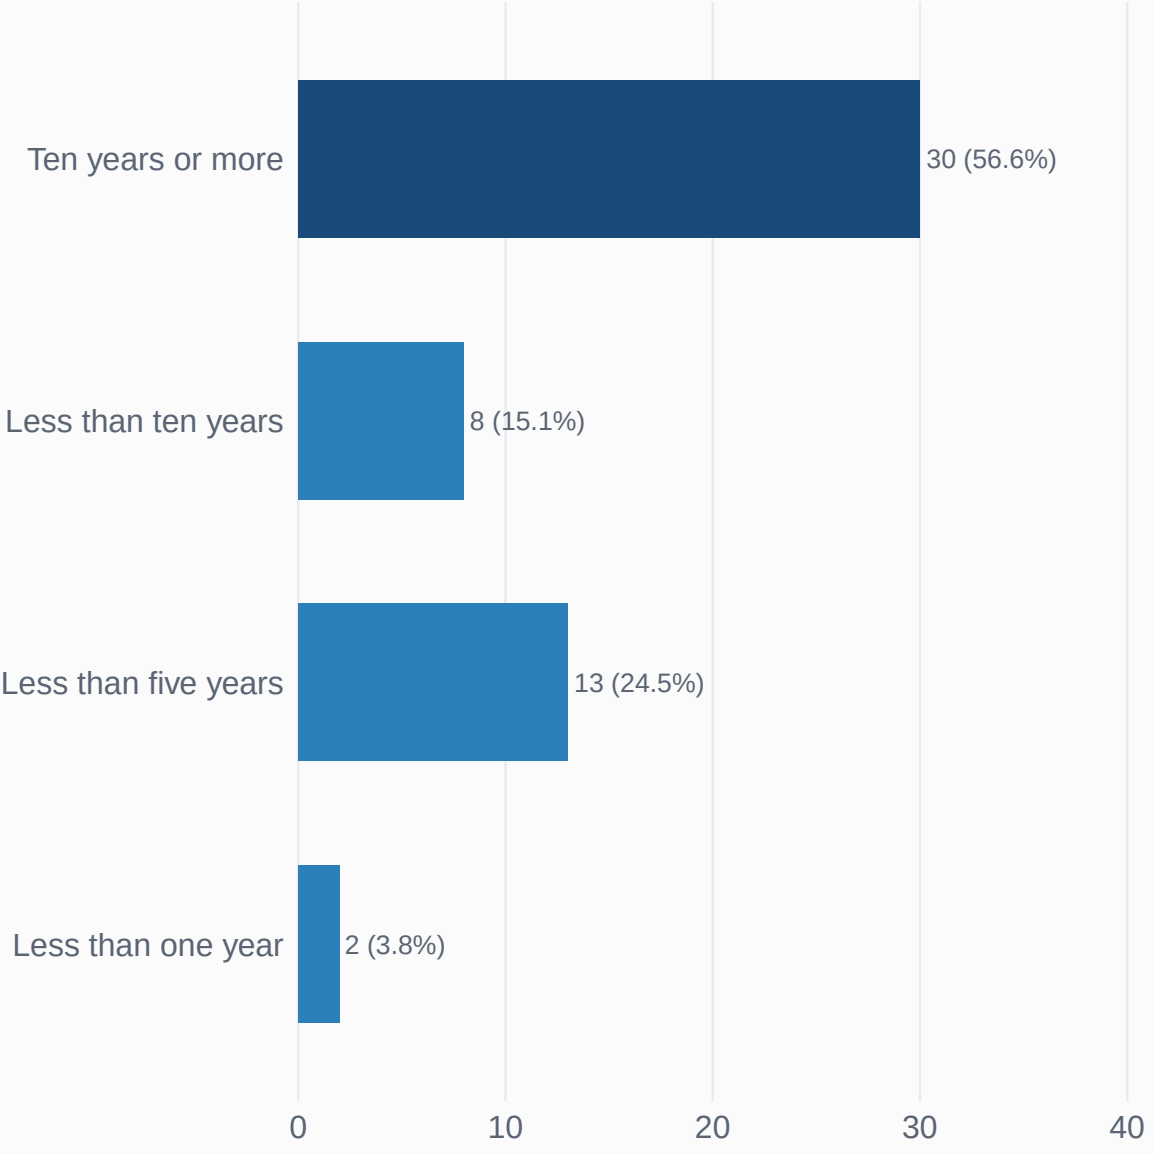
SSS Survey — All respondents — n = 142

Level of involvement in SSS



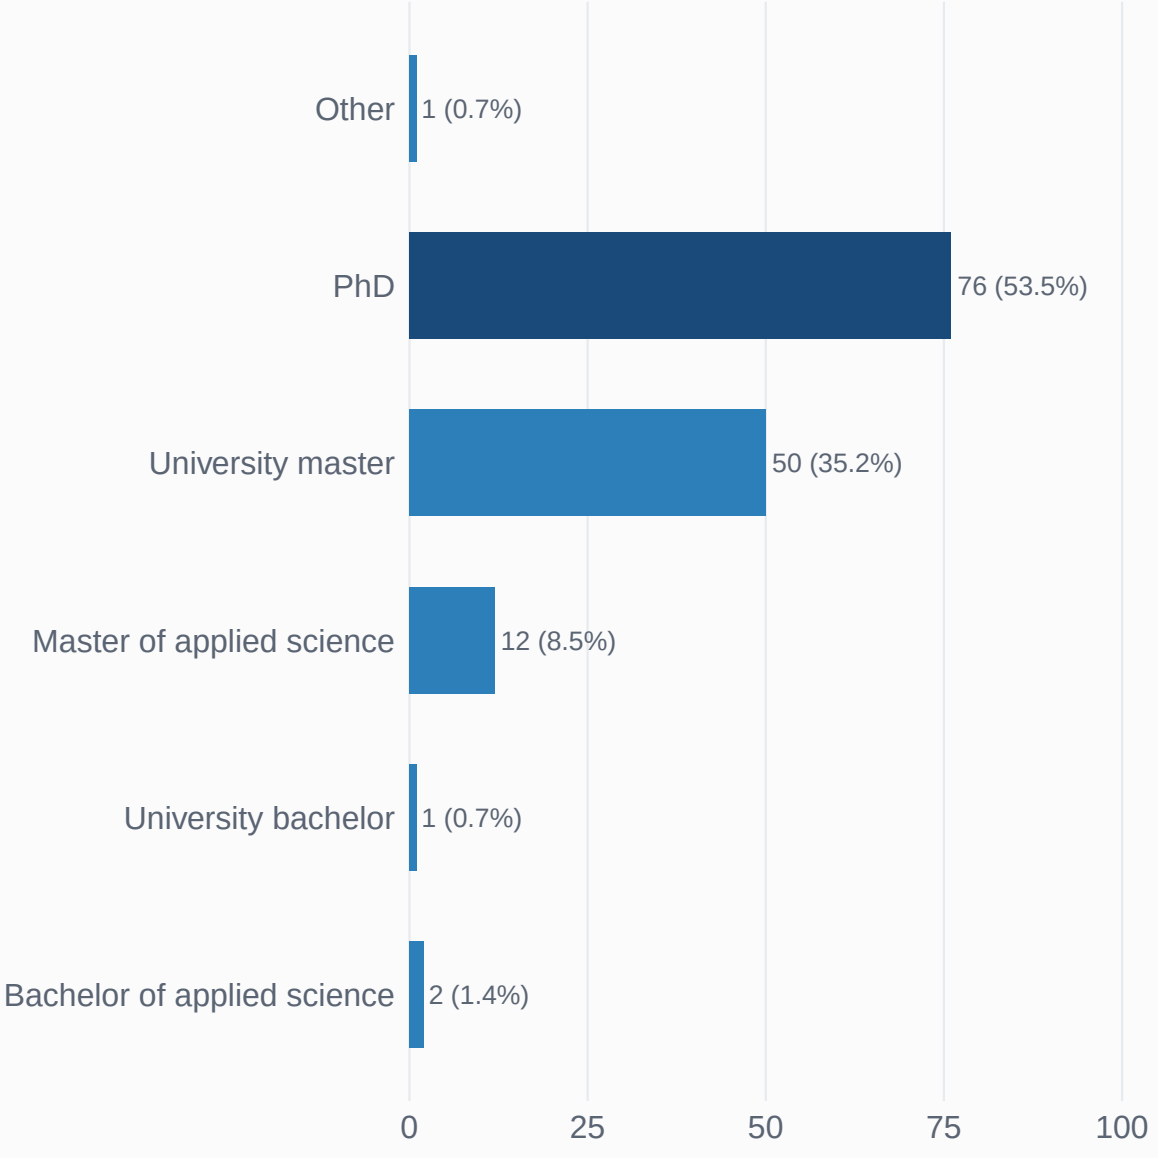
SSS Survey — All respondents — n = 108

Duration of SSS membership



SSS Survey — All respondents — n = 53

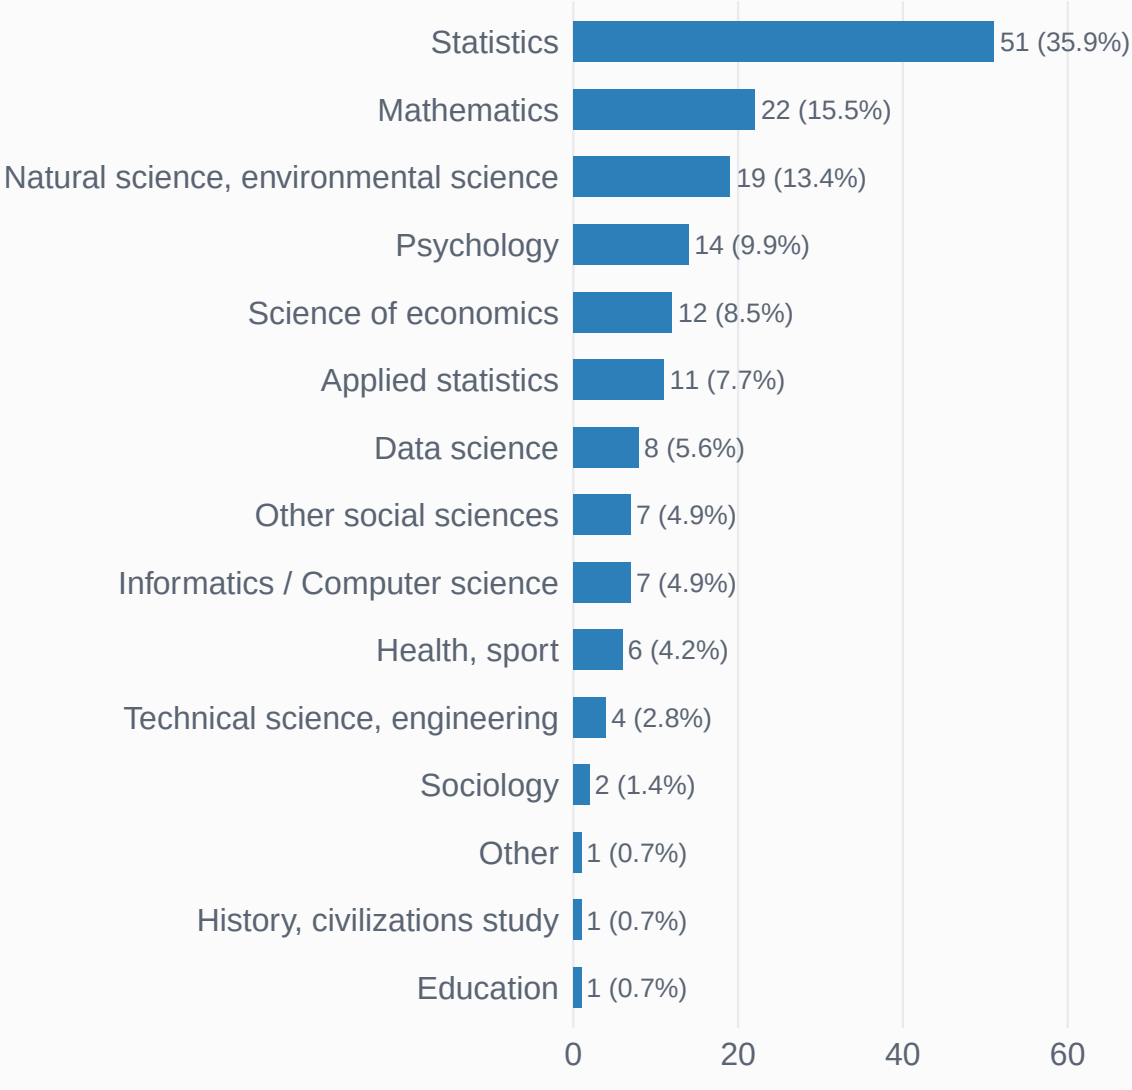
Highest education level



SSS Survey — All respondents — n = 142

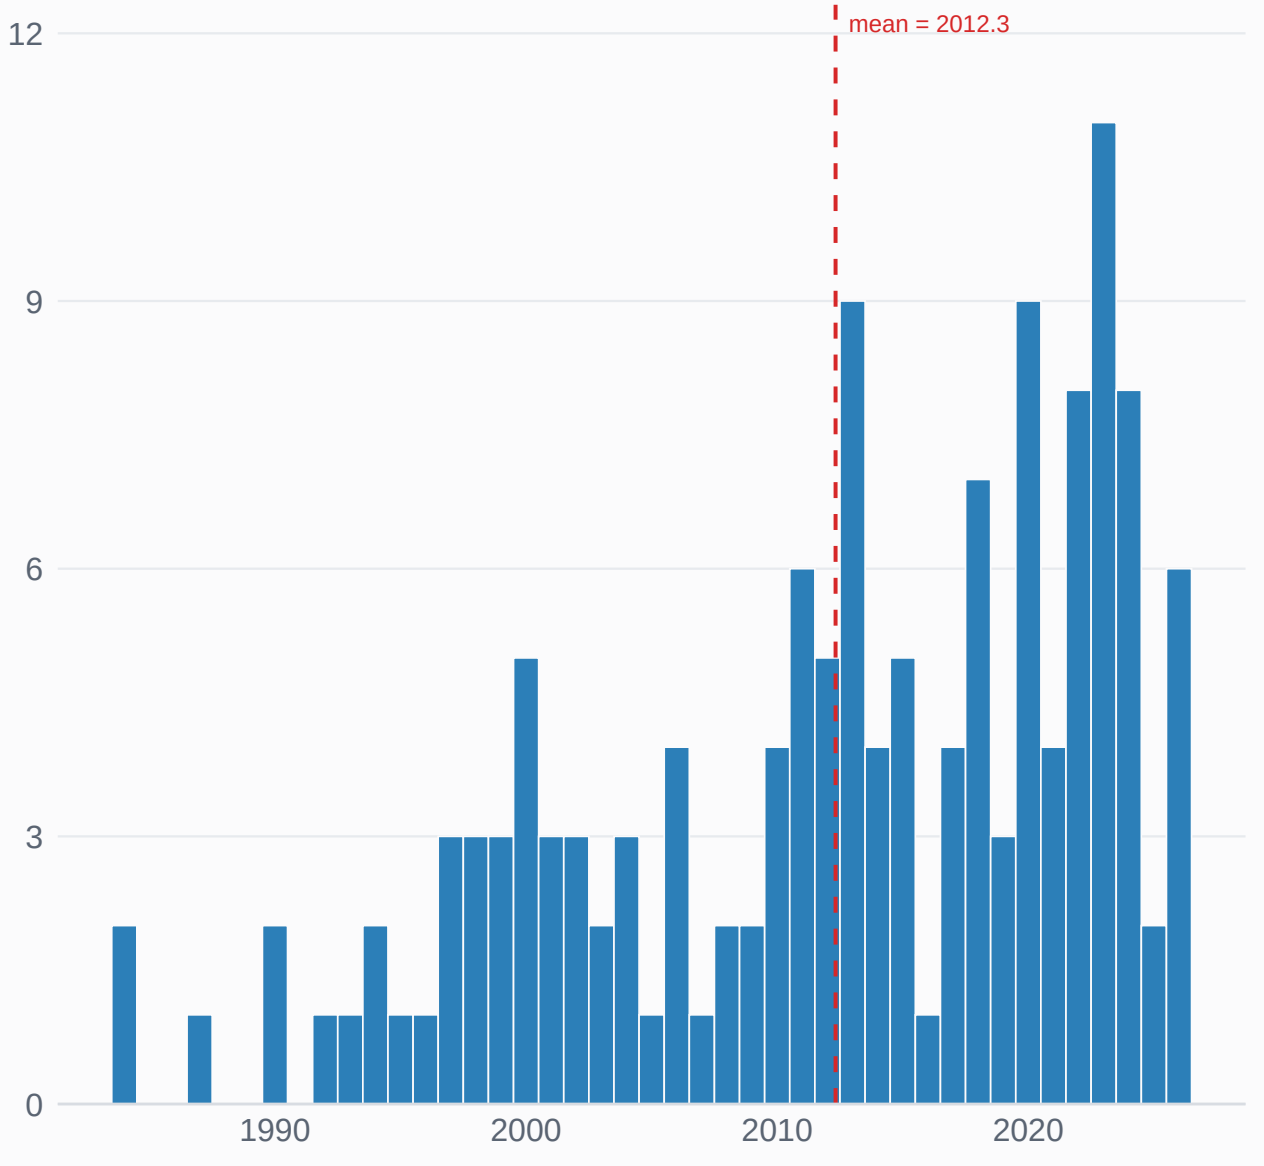
Study domain (field of study)

multiple selections allowed, shares do not sum to 10



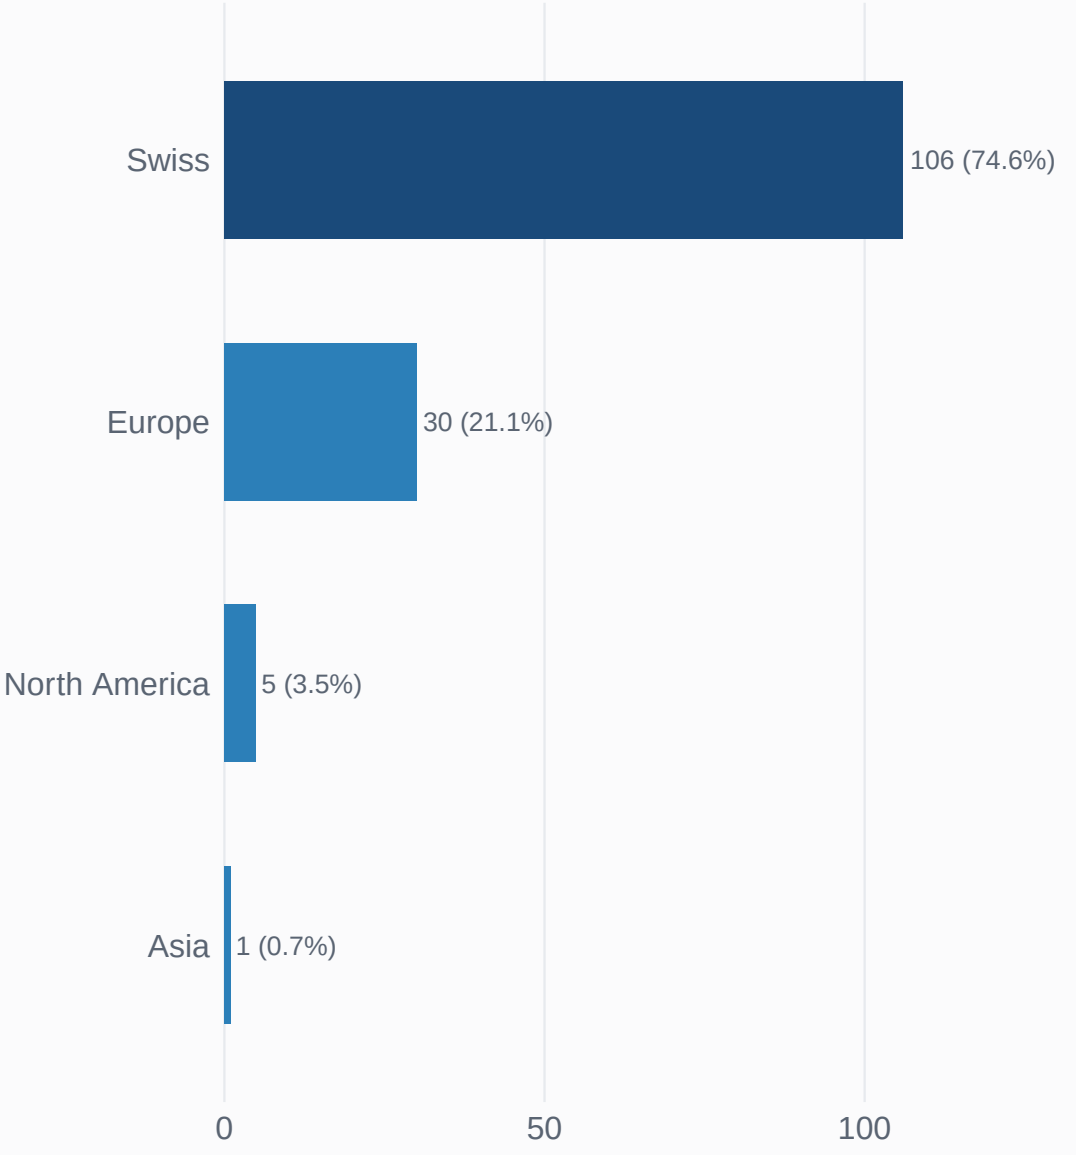
SSS Survey — All respondents — n = 142

Year of graduation — descriptive statistics



SSS Survey — All respondents — n = 142

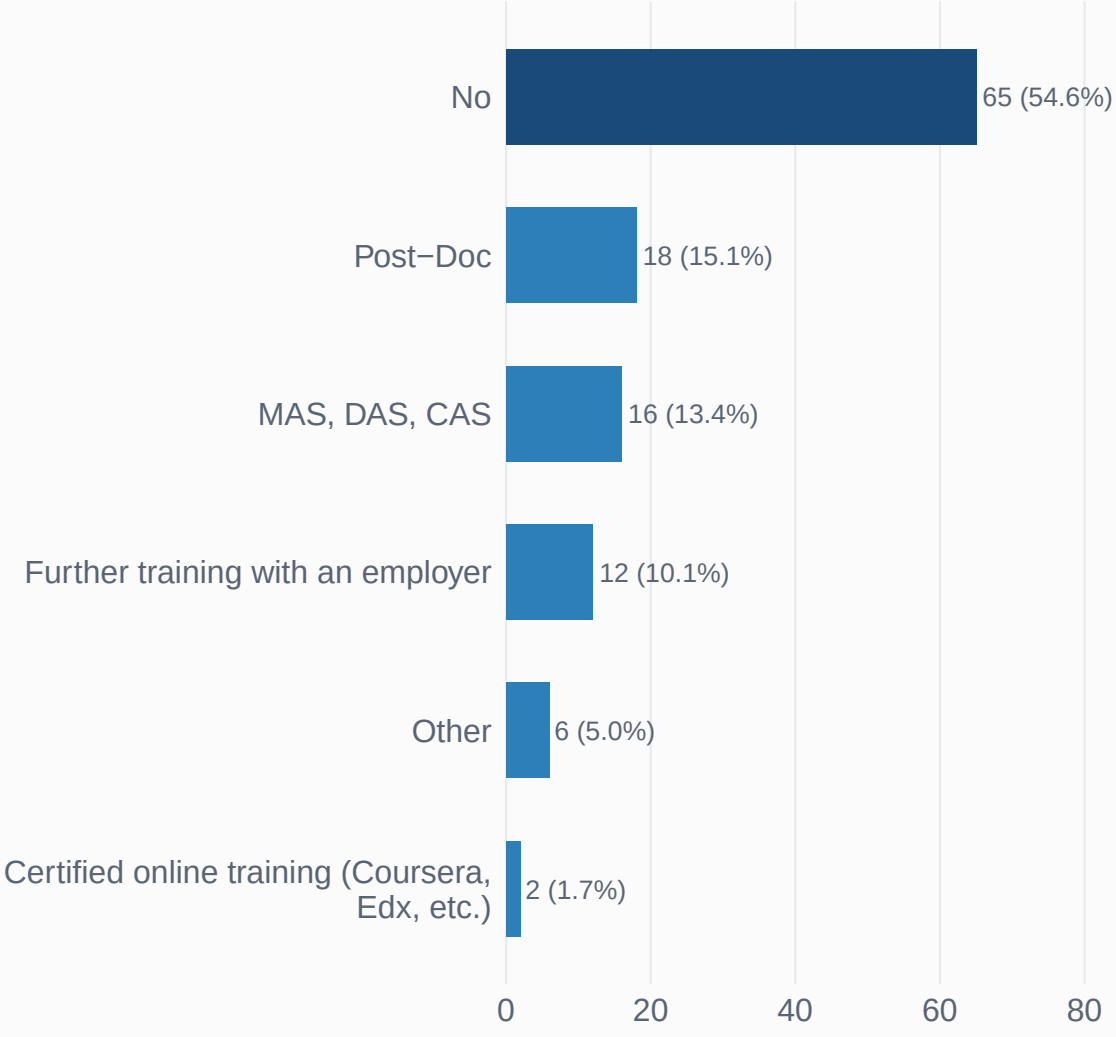
Location of graduation



SSS Survey — All respondents — n = 142

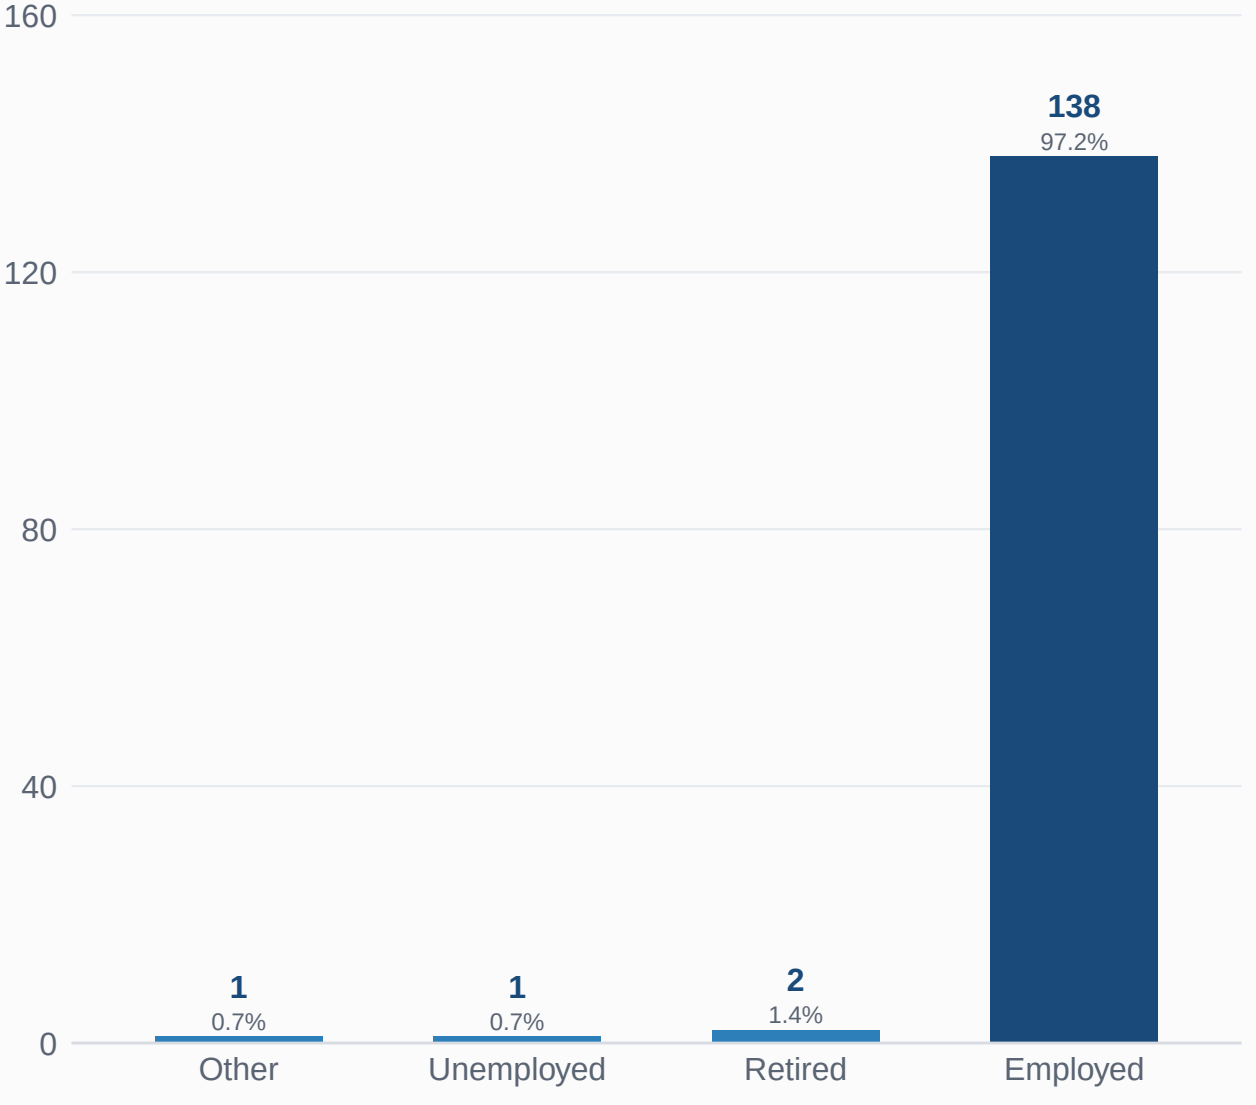
Continuous education

Respondents who selected more than one option are ex
single−choice derivation)



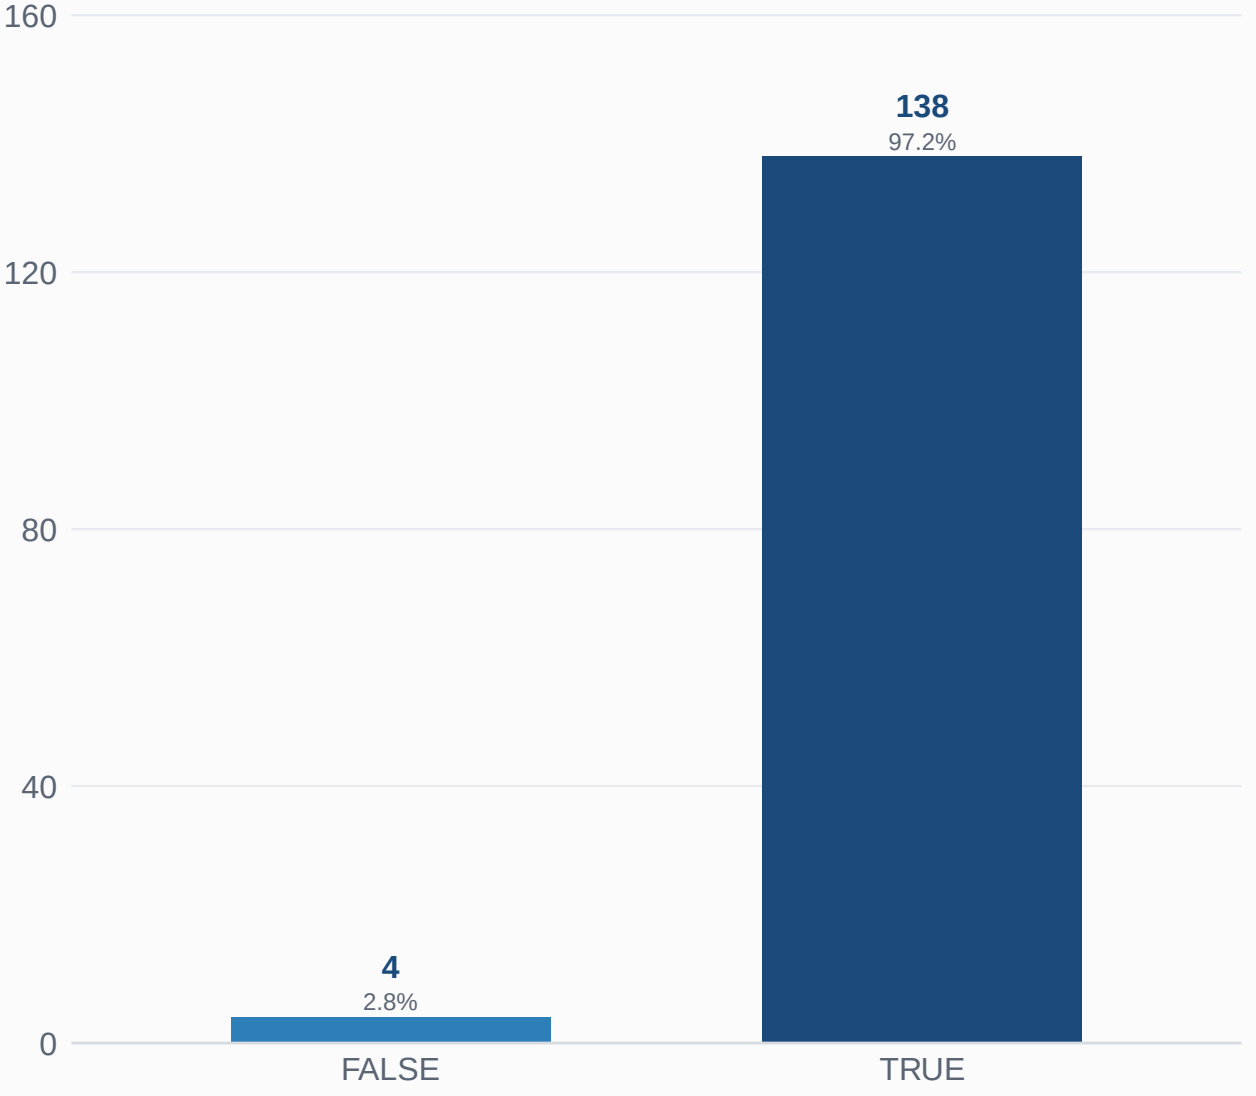
SSS Survey — All respondents — n = 119

Employment status



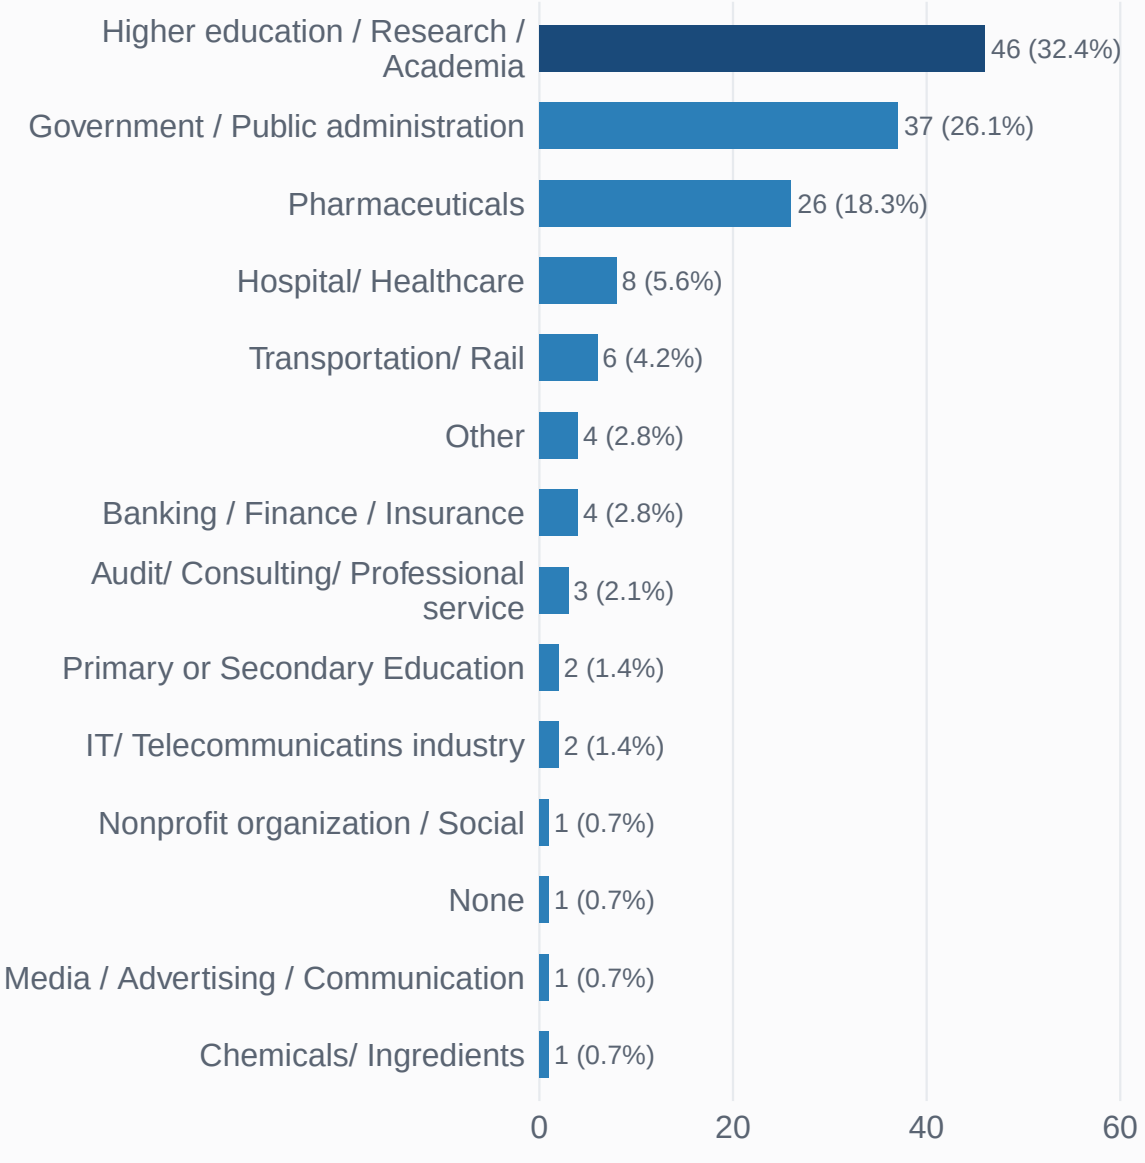
SSS Survey — All respondents — n = 142

Currently employed



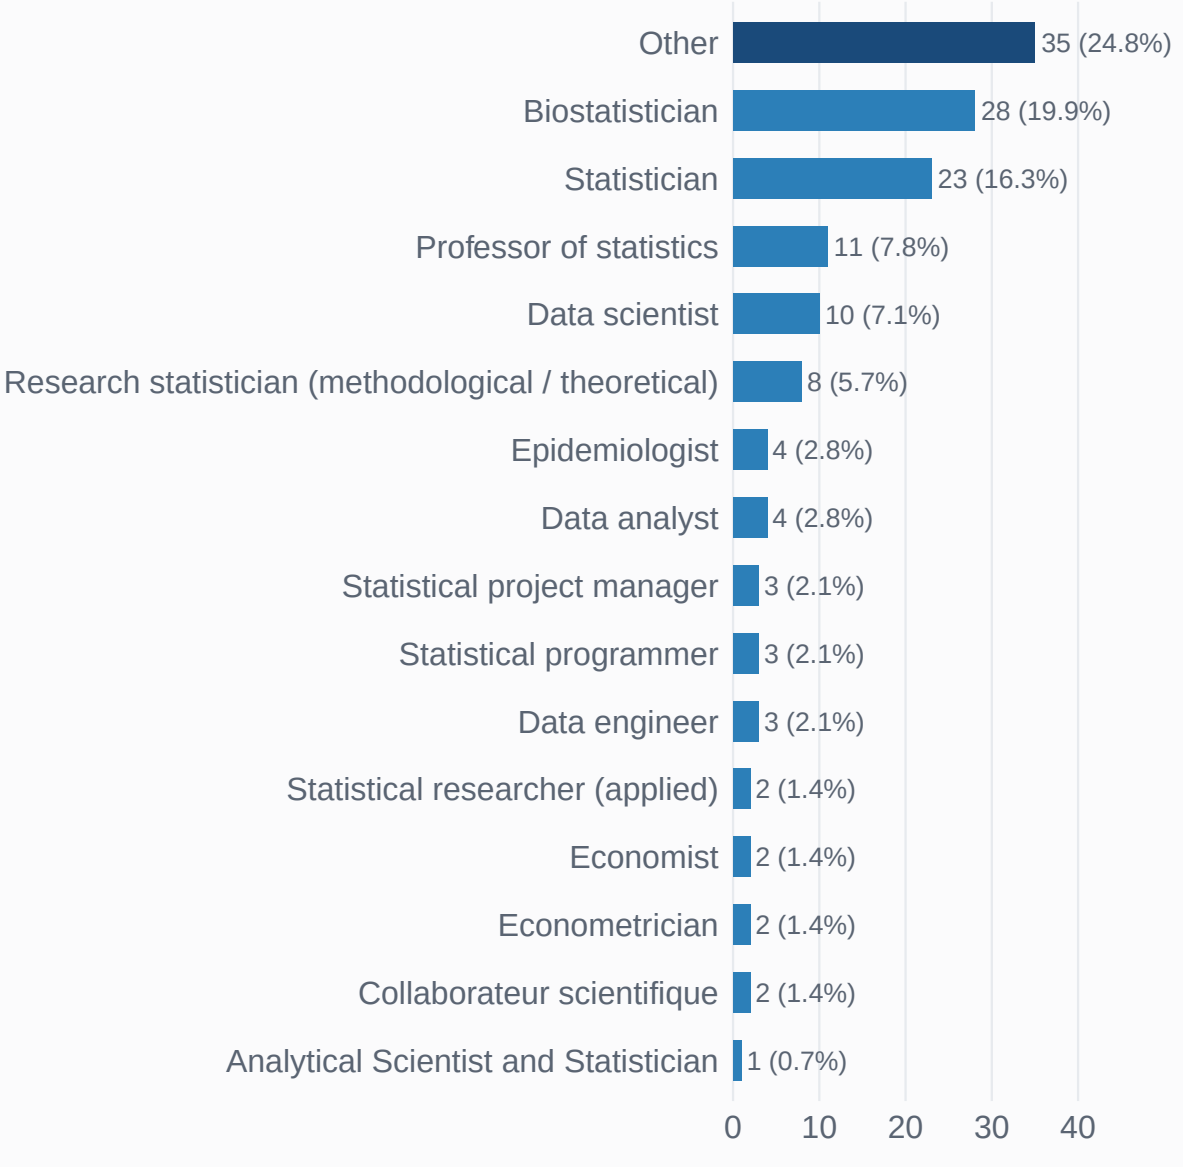
SSS Survey — All respondents — n = 142

Job sector



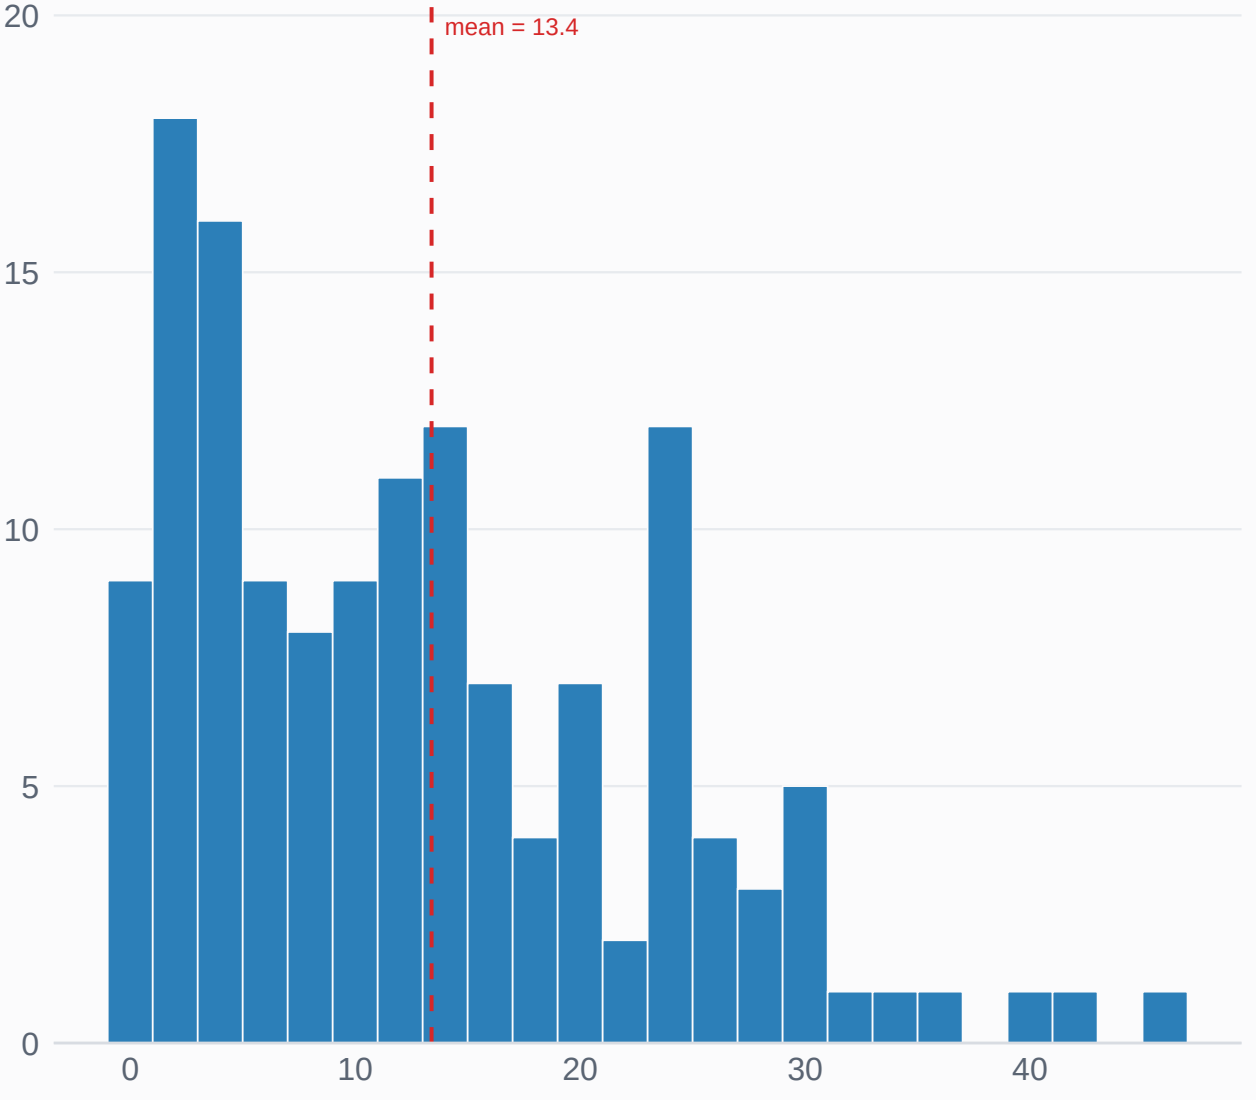
SSS Survey — All respondents — n = 142

Position name (job title)



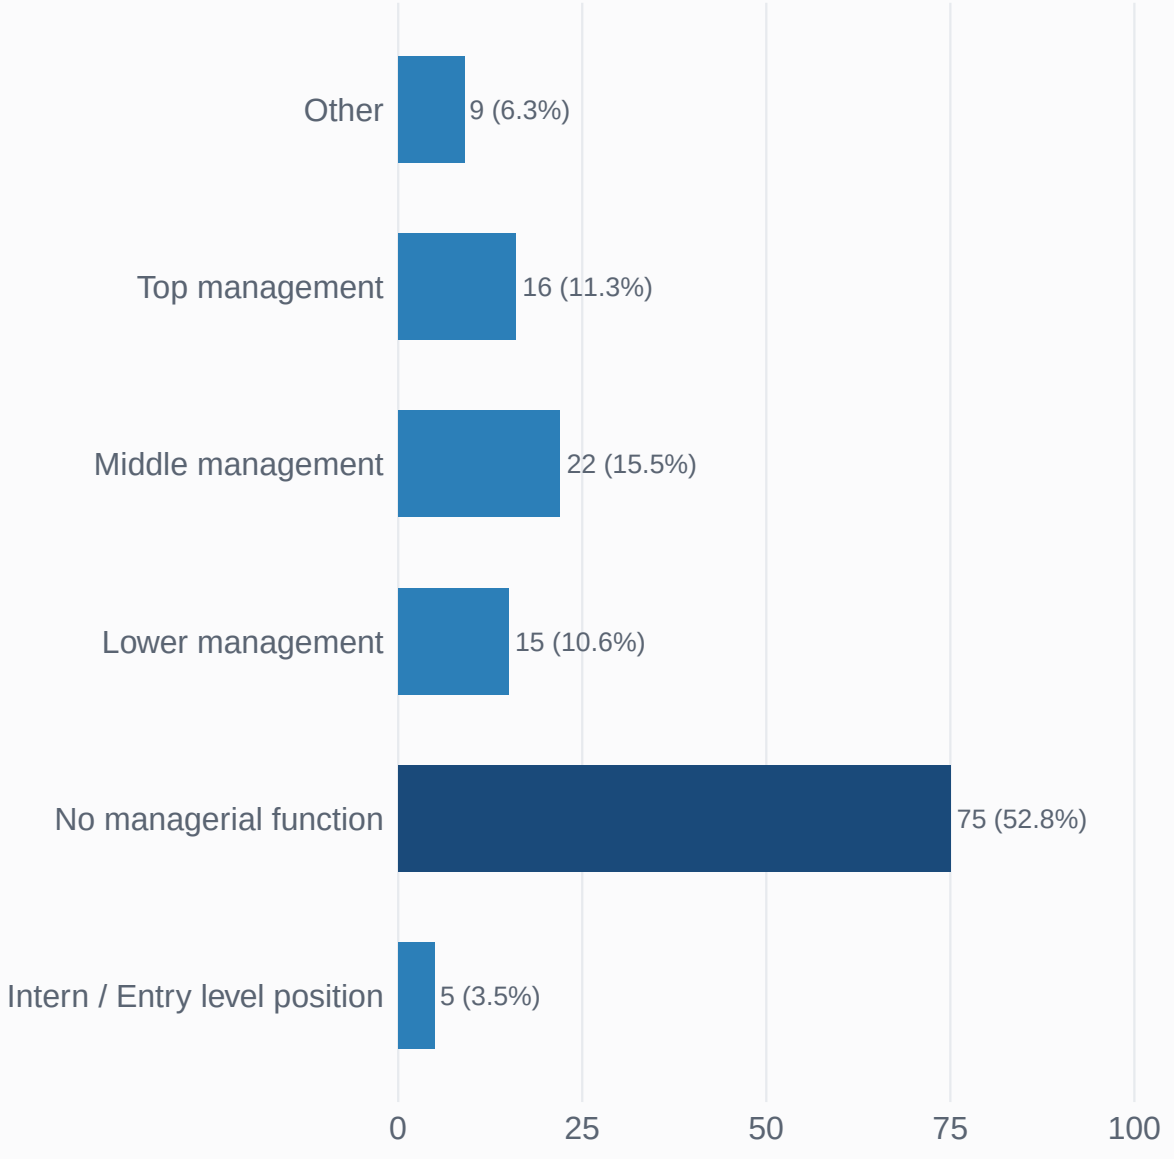
SSS Survey — All respondents — n = 141

Years of professional experience — descriptive statistics



SSS Survey — All respondents — n = 142

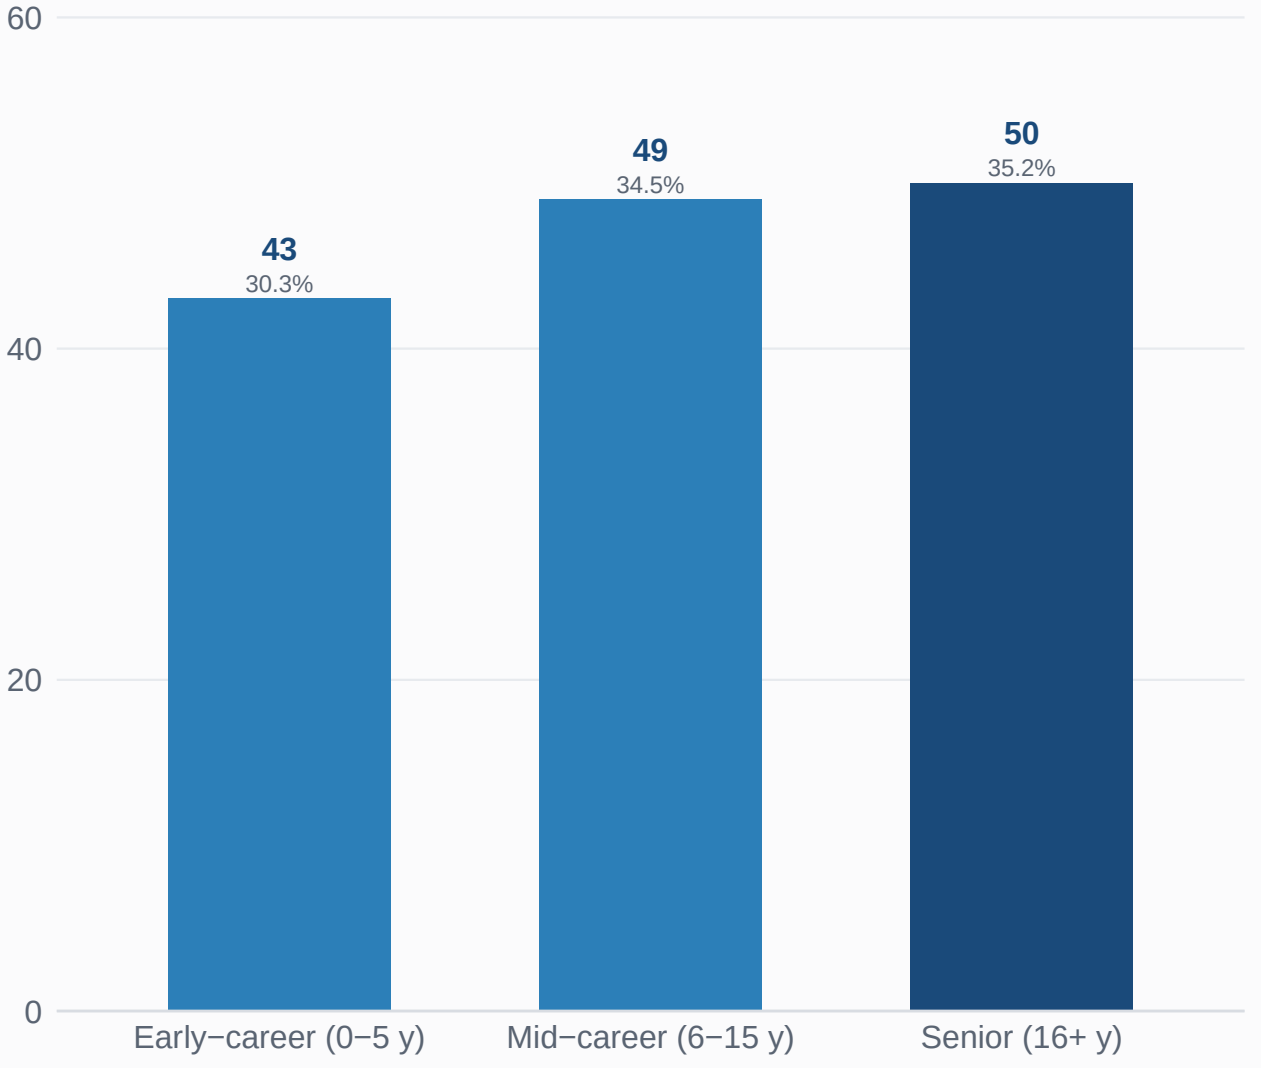
Seniority level



SSS Survey — All respondents — n = 142

Career stage

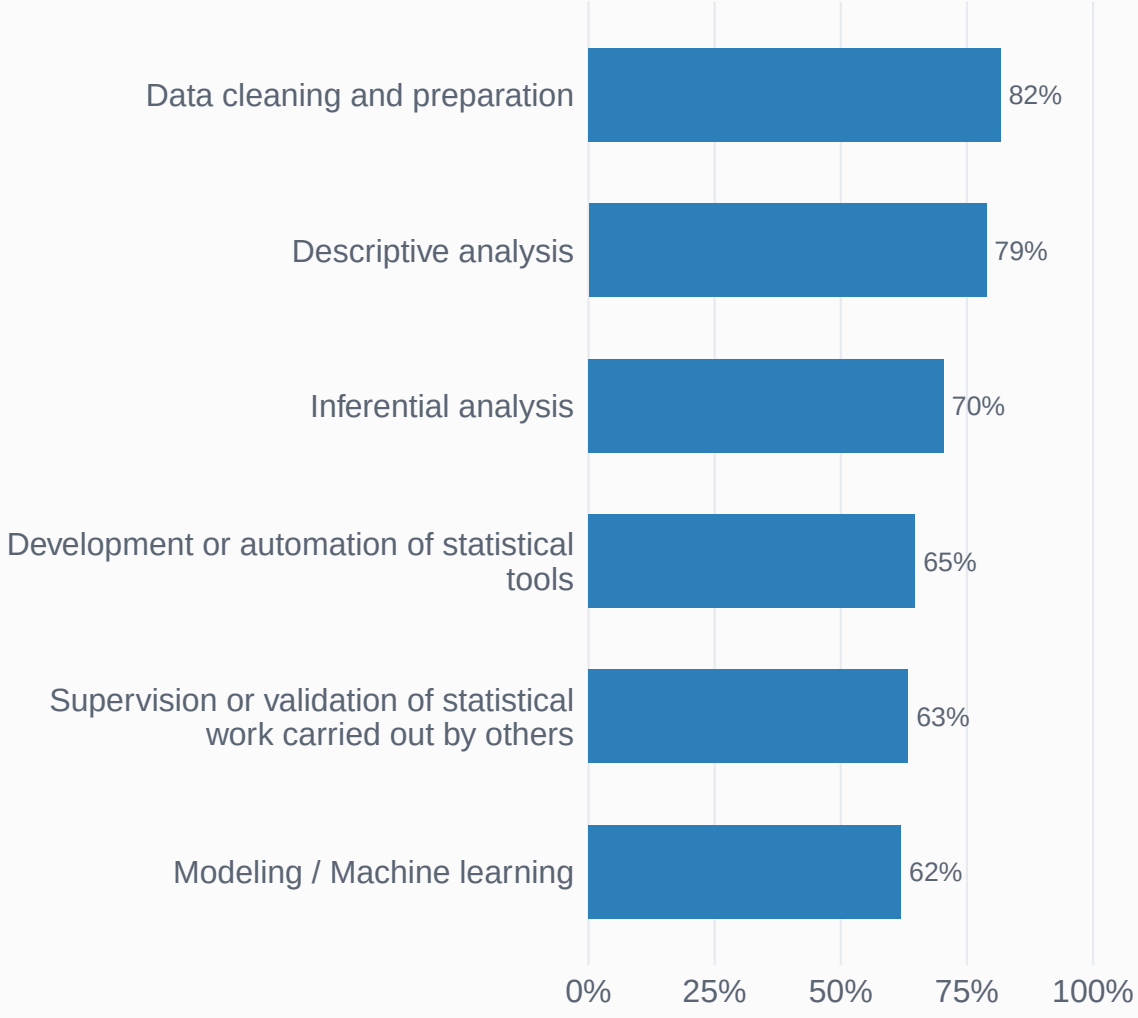
Derived from years of professional experience



SSS Survey — All respondents — n = 142

Statistical activities — extent an involvement

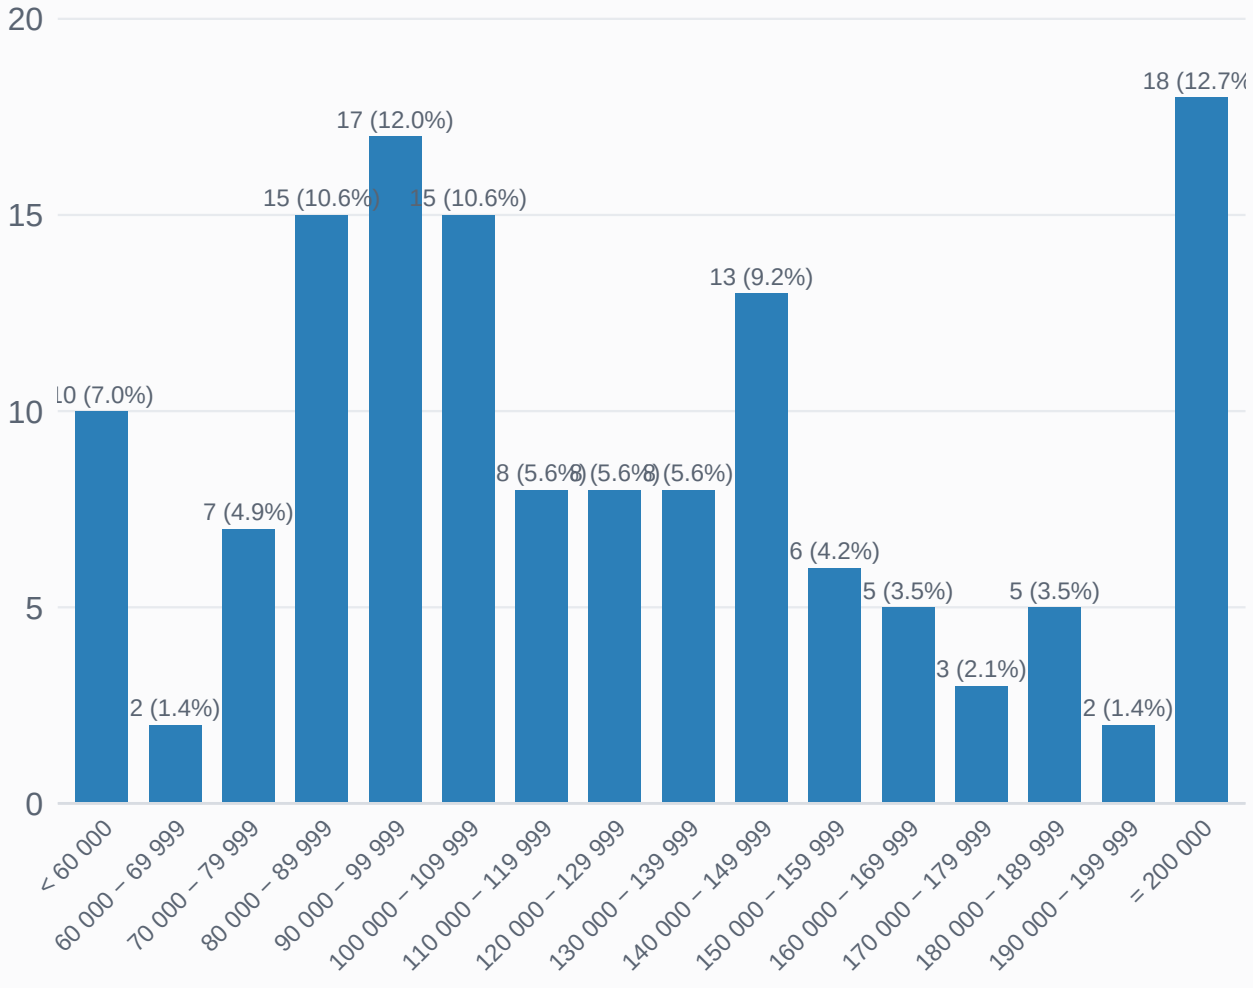
Share of respondents rating the activity 'Important'



SSS Survey — All respondents — n = 142

Gross annual salary — declared salary bands

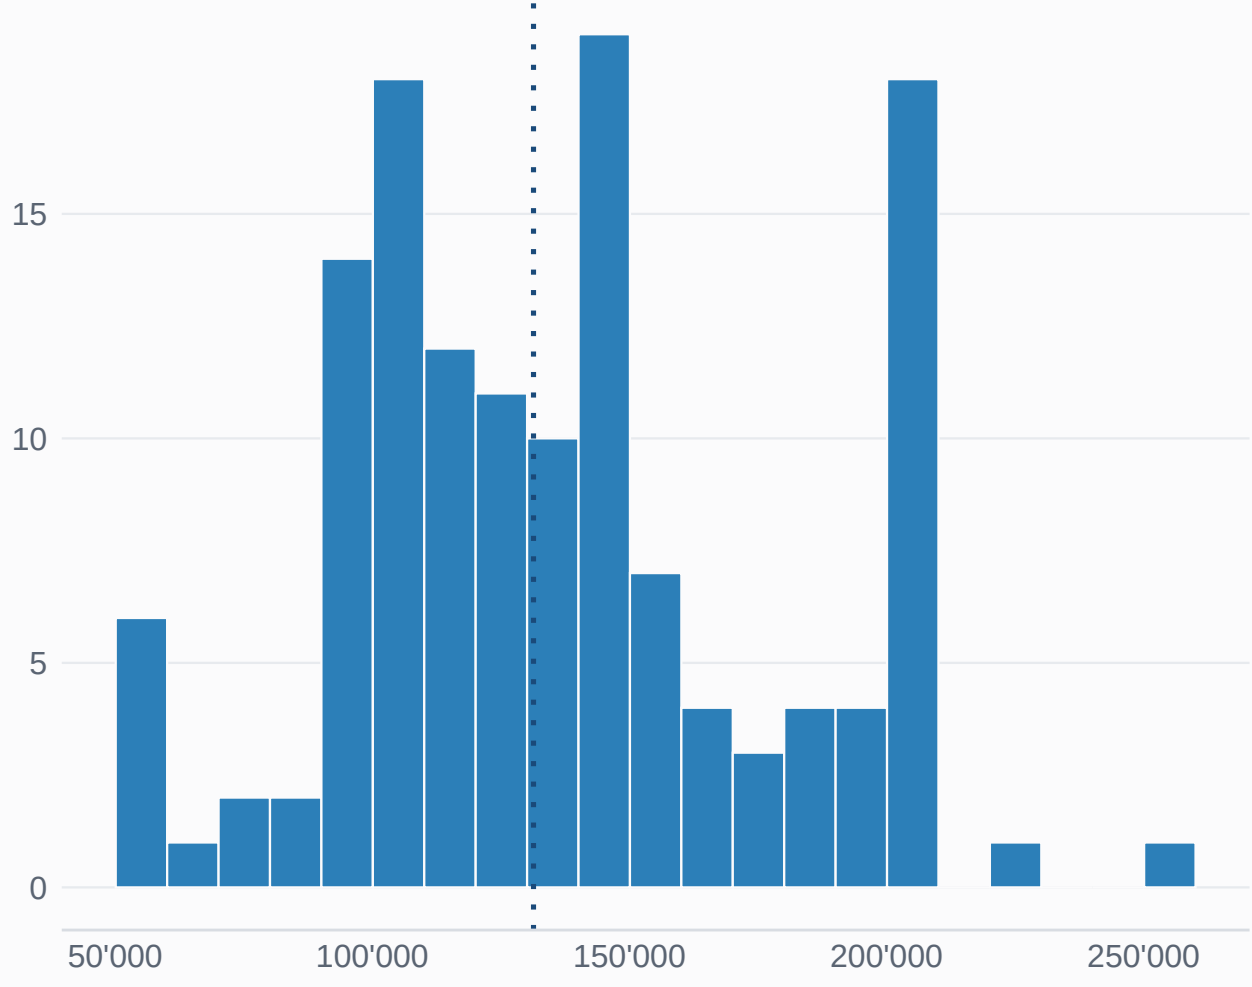
Observed questionnaire categories; not adjusted for work rate



SSS Survey — All respondents — n = 142

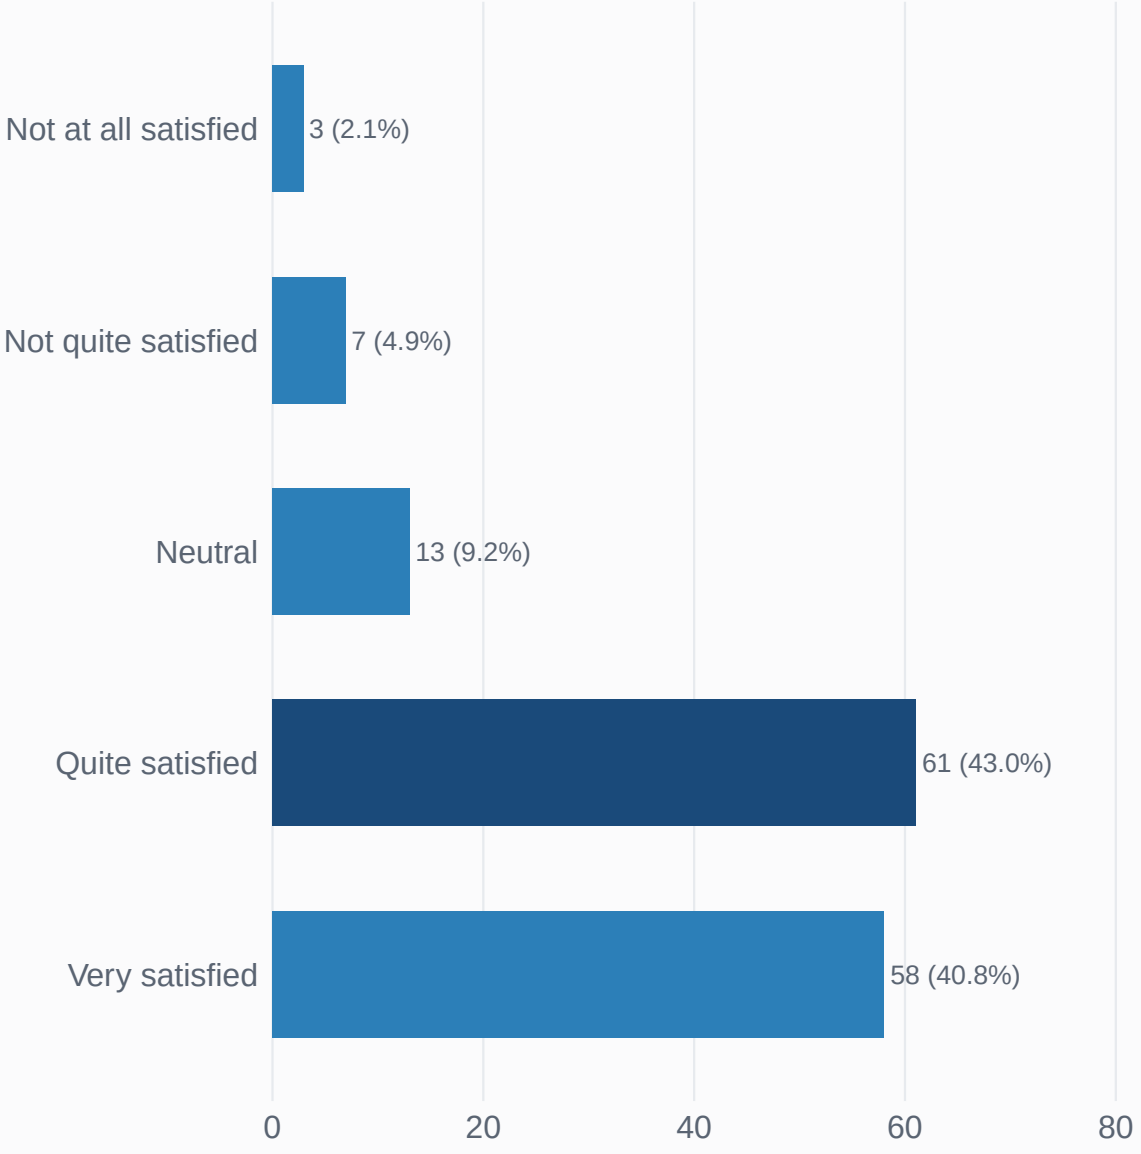
Approximate full−time−equivalent salary

Each respondent's salary−band midpoint is normalized using their reported work rate — Midpoint−based FTE estimate: median = 131 250 (Q1−Q3: 105 556 − 165 000).



SSS Survey — All respondents — n = 137 | Dotted line = approximate median. FTE = salary−band midpoint / work rat

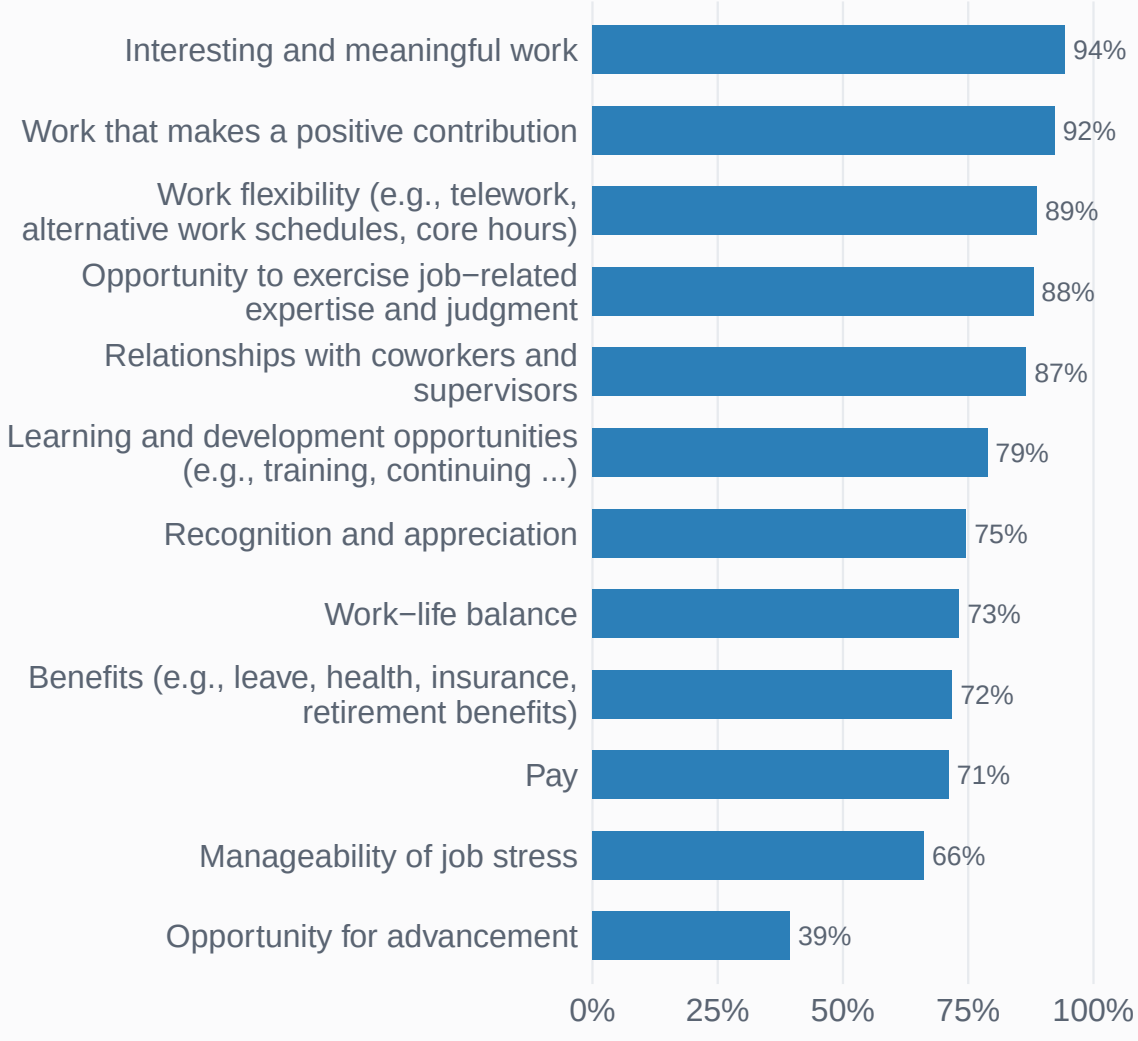
Overall work satisfaction



SSS Survey — All respondents — n = 142

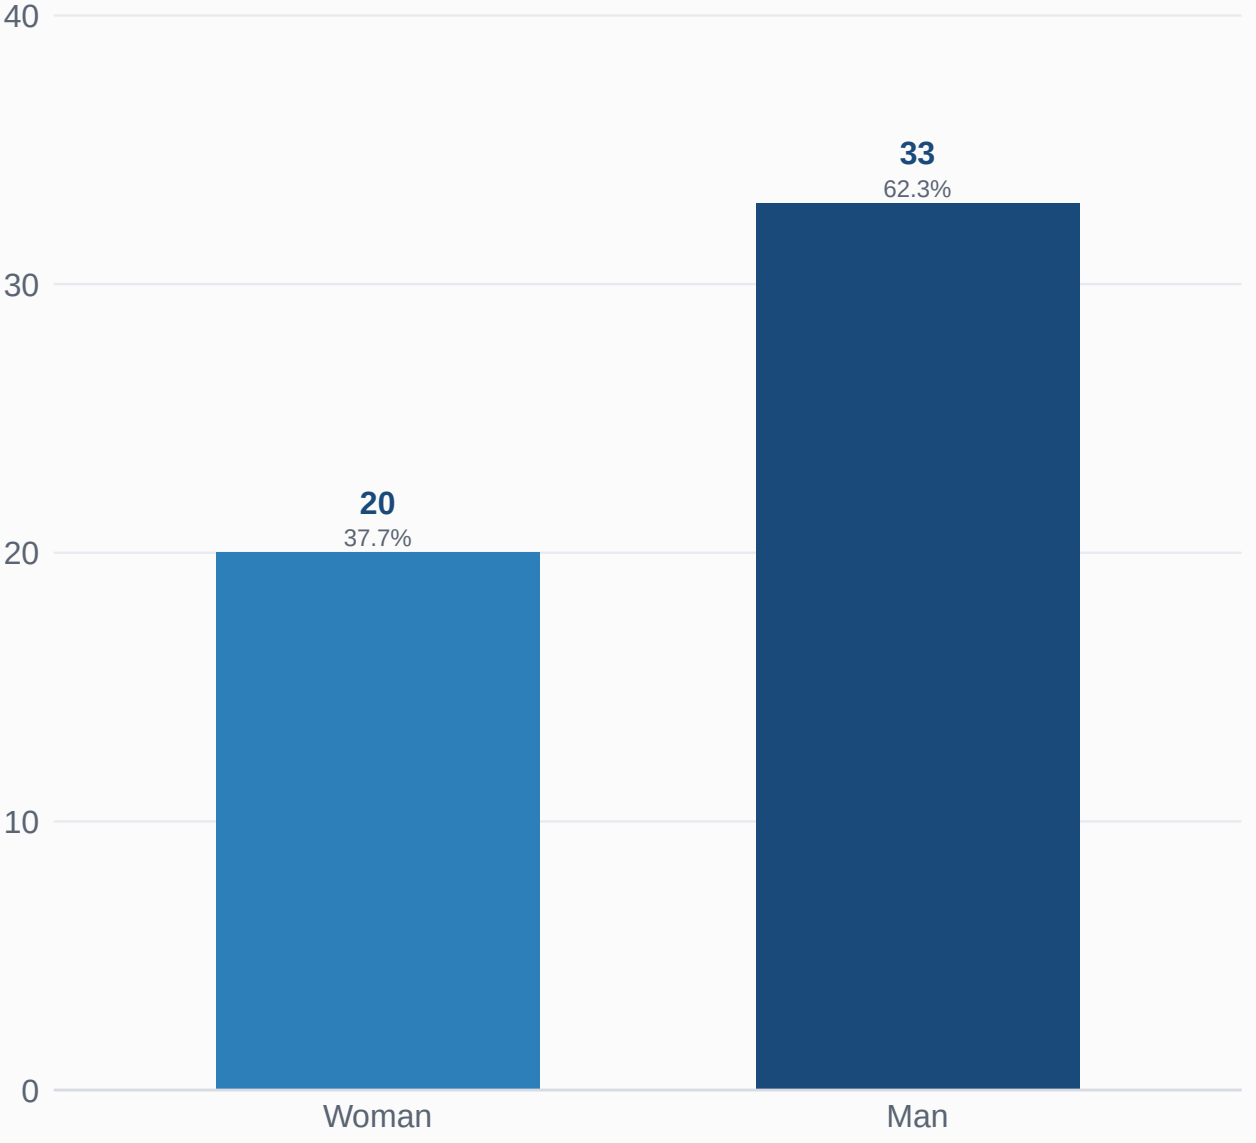
Job satisfaction — detailed asp

Share of respondents 'Very satisfied' or 'Somewha
by % satisfied



SSS Survey — All respondents — n = 142

Gender distribution



SSS Survey — SSS members — n = 53
